	STUDY MODULE DE	SCRIPTION FORM		
Name of the module/subject Computer modelling of mechatronic systems			Code 1010321261010326007	
Field of study	g of mechatronic systems	Profile of study	Year /Semester	
-	ina	(general academic, practical)		
Electrical Engineer	ing	(brak) Subject offered in:	3 / 6 Course (compulsory, elective)	
	Systems in Mechatronics	polish	obligatory	
Cycle of study:		Form of study (full-time,part-time)		
First-cycle studies		full-ti	ime	
No. of hours			No. of credits	
Lecture: 2 Class	ses: - Laboratory: -	Project/seminars:	- 2	
Status of the course in the stu	dy program (Basic, major, other)	(university-wide, from another field	,	
· · · · · ·			brak)	
Education areas and fields of science and art			ECTS distribution (number and %)	
technical sciences			2 100%	
Technical so	ciences		2 100%

Lecture written exam

Course description

Classification models of electromechanical transducers. General description of the models of disease. Mathematical models of electromechanical transducers and complex mechatronic systems. Regulators. Control systems with feedback. Methods of solving equations of state. Differential equations of the form write the loop and nodal electric circuits. Methods for solving nonlinear differential equations. Simulation algorithm electromechanical transducers operating conditions with two degrees of freedom.

Basic bibliography:
