# Assessment methods of study outcomes

#### -Lecture

evaluation of the knowledge on written (test) exam and oral exam Laboratory pre-classes verifying tests evaluation of reports and discussion about problem matters Project

design seminar

evaluation of realized project

## **Course description**

-Tasks and functions of measurement-control and protection elements, digital technology. Structure of measurement lines for the needs of measuring, supervision and protection of electric power system, current and voltage measuring transformers, digital filters, basic measuring-decision algorithms

### **Basic bibliography:**

1. Winkler W., Wiszniewski A.: Automatyka zabezpieczeniowa w systemach elektroener-getycznych. Wydanie I, WNT, Warszawa, 1999. Wydanie II, WNT, Warszawa, 2004.

### Additional bibliography:

1. Szafran j., Wiszniewski A., Algorytmy pomiarowe i decyzyjne cyfrowej automatyki elektroenergetycznej, WNT Warszawa, 2001.

2. Wiszniewski A., Przekładniki w elektroenergetyce. Wyd.2, WNT Warzsawa 1992r.

## Result of average student's workload

| Activity                     | Time (working hours) |      |  |  |
|------------------------------|----------------------|------|--|--|
| 1. Participation in lectures |                      | 40   |  |  |
| Student's workload           |                      |      |  |  |
| Source of workload           | hours                | ECTS |  |  |
| Total workload               | 143                  | 5    |  |  |
| Contact hours                | 92                   | 4    |  |  |
| Practical activities         | 30                   | 1    |  |  |
