

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Automatics and Measurements in Electrical Power Engineering		Code 1010311261010314795
Field of study Electrical Engineering	Profile of study (general academic, practical) general academic	Year /Semester 3 / 6
Elective path/specialty Distribution Devices and Electrical	Subject offered in: Polish	Course (compulsory, elective) obligatory
Cycle of study: First-cycle studies	Form of study (full-time, part-time) full-time	
No. of hours Lecture: 2 Classes: - Laboratory: 2 Project/seminars: 1		No. of credits 5
Status of the course in the study program (Basic, major, other) other		(university-wide, from another field) university-wide
Education areas and fields of science and art technical sciences		ECTS distribution (number and %) 5 100%
Responsible for subject / lecturer: dr hab. inż. Kazimierz Musierowicz, prof. nadzw. email: kazimierz.musierowicz@put.poznan.pl tel. 61 665 20 40 Wydział Elektryczny ul. Piotrowo 3A 60-965 Poznań		
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	Basic knowledge in the scope of electrical engineering and the work of electric power systems in normal and disturbed states
2	Skills	Ability to understand and to interpret passed on knowledge and to self-study in the domain connected with chosen course of studying
3	Social competencies	Has a consciousness of necessity to widen competences and willingness to work in a team
Assumptions and objectives of the course: -To acquaint with basic tasks of electrical power engineering protection and with methods of measuring criterion quantities for the needs of supervision, control and protection of power system		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. Has basic knowledge in the scope of automatics and automatic control, knows operation criteria and the rules of the chose of electric power engineering protection - [K_W22+++]		
Skills:		
1. Is able to design simple electrical system for various applications, using proper methods, technics and tools - [K_U03+]		
Social competencies:		
1. Is aware of significance of his own work and willingness to acquiesce to principles of working in group and to be responsible for collectively realized task - [K_K03++]		
Assessment methods of study outcomes		

<div>-Lecture</div> <div>evaluation of the knowledge on written (test) exam and oral exam</div> <div>Laboratory</div> <div>pre-classes verifying tests</div> <div>evaluation of reports and discussion about problem matters</div> <div>Project</div> <div>design seminar</div> <div>evaluation of realized project</div>		
Course description		
<div>-Tasks and functions of measurement-control and protection elements, digital technology. Structure of measurement lines for the needs of measuring, supervision and protection of electric power system, current and voltage measuring transformers, digital filters, basic measuring-decision algorithms</div>		
Basic bibliography:		
<div>1. Winkler W., Wiszniewski A.: Automatyka zabezpieczeniowa w systemach elektroener-getycznych. Wydanie I, WNT, Warszawa, 1999. Wydanie II, WNT, Warszawa, 2004.</div>		
Additional bibliography:		
<div>1. Szafran j., Wiszniewski A., Algorytmy pomiarowe i decyzyjne cyfrowej automatyki elektroenergetycznej, WNT Warszawa, 2001.</div> <div>2. Wiszniewski A., Przekładniki w elektroenergetyce. Wyd.2, WNT Warszawa 1992r.</div>		
Result of average student's workload		
Activity		Time (working hours)
1. Participation in lectures		40
Student's workload		
Source of workload	hours	ECTS
Total workload	143	5
Contact hours	92	4
Practical activities	30	1
