

STUDY MODULE DESCRIPTION FORM				
Name of the module/subject Wood construction in terms of historical and cultural			Code 1010115111010116280	
Field of study Civil Engineering Extramural Second-cycle		Profile of study (general academic, practical) general academic	Year /Semester 1 / 1	
Elective path/specialty Structural Engineering		Subject offered in: Polish	Course (compulsory, elective) obligatory	
Cycle of study: Second-cycle studies		Form of study (full-time,part-time) part-time		
No. of hours Lecture: 15 Classes: - Laboratory: - Project/seminars: -			No. of credits 1	
Status of the course in the study program (Basic, major, other) major			(university-wide, from another field) from field	
Education areas and fields of science and art technical sciences Technical sciences			ECTS distribution (number and %) 1 100% 1 100%	
Responsible for subject / lecturer: Piotr Rapp email: piotr.rapp@put.poznan.pl tel. 61 6652094 Faculty of Civil and Environmental Engineering 60-965 Poznan, ul. Piotrowo 5				
Prerequisites in terms of knowledge, skills and social competencies:				
1	Knowledge	The basic knowledge on structural mechanics and strength of materials.		
2	Skills	Determining of the static model of a structure, determining of inner and support forces, determining of stresses and deflections in structural members.		
3	Social competencies	Team work ability.		
Assumptions and objectives of the course: The target of the course is to learn structure, elasticity and strength properties of wood, carpentry joints, timber fasteners (nails, bolts,screws, tooth-plate connectors, shear plates), glued joints, methods of wood structure designing, methods of joint designing, beam structures, purlin roof structures, collar-beam roof structures.				
Study outcomes and reference to the educational results for a field of study				
Knowledge:				
1. Knowing of specific properties f wood against a background of other materials - [-] 2. Knowing of thermal and moisture working conditions for a designed structure - [-] 3. Knowing of timber joint designing methods resulting from wood properties - [K_W07]				
Skills:				
1. Determining data, structural analysis and strength analysis of wood structures - [K_U14] 2. Designing structure joints - [K_U07] 3. Making technical drawings of wood structures - [K_U14]				
Social competencies:				
1. Team work ability. - [K_K01]				
Assessment methods of study outcomes				

Passing the course involves passing project seminars and lectures.
 Passing project seminars involves preparation and oral project defence.
 Passing lectures involves written final exam.
 Exam marks scale in %:
 90 very good (A)
 85 good plus (B)
 75 good (C)
 65 satisfactory plus (D)
 55 satisfactory (E)
 below 54 unsatisfactory/ failed (F)

Course description

Wood as a building material. Structure, elasticity and strength properties of wood. Carpentry joints. Timber fasteners (nails, bolts, screws, toot-plate connectors, shear plates). Glued joints. Methods of wood structure designing. Methods of joint designing. Beam structures. Purlin roof structures. Collar-beam roof structures.
