

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Geology		Code 1010104121010125119
Field of study Civil Engineering First-cycle Studies	Profile of study (general academic, practical) general academic	Year /Semester 1 / 2
Elective path/specialty -	Subject offered in: Polish	Course (compulsory, elective) obligatory
Cycle of study: First-cycle studies	Form of study (full-time, part-time) part-time	
No. of hours Lecture: 12 Classes: - Laboratory: 10 Project/seminars: -		No. of credits 3
Status of the course in the study program (Basic, major, other) major		(university-wide, from another field) from field
Education areas and fields of science and art technical sciences Technical sciences		ECTS distribution (number and %) 3 100% 3 100%
Responsible for subject / lecturer: dr hab. Katarzyna Machowiak email: katarzyna.machowiak@put.poznan.pl tel. (61) 665 5857 Faculty of Civil and Environmental Engineering ul. Piotrowo 5 60-965 Poznań		Responsible for subject / lecturer: mgr Michalina Flieger-szymańska email: Michalina.Flieger-Szymanska@put.poznan.pl tel. (61) 665 2136 Faculty of Civil and Environmental Engineering ul. Piotrowo 5 60-965 Poznań
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	Basic knowledge of geography, chemistry, physics, descriptive geometry and geodesy
2	Skills	Student knows: - fundamental rights occurring in nature - basic information about chemical compounds - the basics of mechanics - problems of geodesy and mapping
3	Social competencies	Student: - is able to work independently and to group work - is responsible for the results of his work - self expanding his knowledge
Assumptions and objectives of the course: Achieving a basic level of geology knowledge		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. Processes taking place in the depths of the Earth and on its surface - [T1A_W04, T1A_W01]		
2. Origin of rock-forming minerals, igneous, sedimentary and metamorphic rocks and their classification - [T1A_W04, T1A_W01]		
3. Origin and characteristic of subsoil, evaluation of basic geotechnical parameters - [T1A_W04, T1A_W01]		
Skills:		
1. Determination the suitability of different types of subsoil for investment purposes - [T1A_U06, T1A_U08, T1A_U13, T1A_U12, T1A_U14]		
2. Recognizing and naming the basic igneous, sedimentary and metamorphic rocks - [T1AU_02, T1A_U03, T1A_U04]		
3. Description of the rocks according to the scheme: structure, texture, mineral composition composition, the name of - [T1AU_01, T1A_U03]		
Social competencies:		

1. Student is responsible for the results of his work - [T1A_K03, T1A_K02, T1A_K04, T1K06]
2. Student is aware of the need to improve his professional qualifications - [T1A_K03]
3. Student understands the need for consultation and collaboration between design engineer and geologist during the task realization - [T1A_K03, T1A_K04, T1A_K06]

Assessment methods of study outcomes

Written test of the lecture material (test).
 Practical identification of minerals and rocks (laboratory).

Course description

1. Evolution and origin of the Earth, the basic theories used in stratigraphy
2. Structure of the Earth, distribution of elements in the lithosphere and deeper Earth zones
3. Convergent and divergent zones, earthquakes
4. Basic knowledge of tectonics: mechanic of faults and folds,
5. Endogenous processes - volcanism and plutonism
6. Exogenous processes: physical and chemical weathering
7. Erosion and accumulation activity of glaciers
8. Bases of hydrogeology (origin of water resources on the Earth, the water in unsaturated and saturated zone, groundwater flow), water in the ground and building ground filter deformation
9. The processes of erosion and accumulation caused by the effect of surface water flowing
10. The processes of erosion and accumulation caused by the effect of surface water bodies,
11. The processes of erosion and accumulation caused by the wind activity
12. Surface mass movements, slope stability criteria,
13. Geotechnical classification of building subsoil
14. Methods and ways to study the geotechnical parameters of subsoil
15. Methodology and scope of preparing the geological and geotechnical-engineering documentation
16. Classification of igneous rocks and their macroscopic description
17. Classification, identification and description of the main sedimentary rocks
18. Metamorphism: classification and recognition of basic metamorphic rocks
19. The rocks as a building subsoil, structural bonding of soils, their sensitivity to changes in the phase composition, the review of specific soils

Basic bibliography:

Additional bibliography:

Result of average student's workload

Activity	Time (working hours)	
1. Participation in lectures	12	
2. Participation in laboratory exercises	10	
3. Preparing to the laboratory exercises	5	
4. Participation in the consultation	3	
5. Preparing to the final test in the field of laboratory exercises	5	
6. Preparing to the final test in the field of lectures	7	
Student's workload		
Source of workload	hours	ECTS
Total workload	75	3
Contact hours	25	1
Practical activities	13	1
