

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject (-)		Code 1010104181010113387
Field of study Civil Engineering First-cycle Studies	Profile of study (general academic, practical) general academic	Year /Semester 4 / 8
Elective path/specialty -	Subject offered in: Polish	Course (compulsory, elective) elective
Cycle of study: First-cycle studies	Form of study (full-time, part-time) part-time	
No. of hours Lecture: 10 Classes: - Laboratory: - Project/seminars: 10		No. of credits 3
Status of the course in the study program (Basic, major, other) major		(university-wide, from another field) from field
Education areas and fields of science and art technical sciences Technical sciences		ECTS distribution (number and %) 2 100% 2 100%
Responsible for subject / lecturer: dr inż. Adam Uryzaj email: adam.uryzaj@put.poznan.pl tel. 0616652058 Wydział Budownictwa i Inżynierii Środowiska ul. Piotrowo 5, 60-965 Poznań		
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	A student has knowledge of: general mechanics and strength of materials, basis of theory of concrete structures, knows analysis principles of simple and complex RC elements design with taken RC two-way reinforced slabs into consideration.
2	Skills	A student can estimate and report loads acting on building structures. Student can classify building structures, design RC structure elements with taken two-way reinforced slabs into consideration and choose analytical or numerical solution of engineering problems.
3	Social competencies	A student understands the need for lifelong learning and knows how to interact in a group.
Assumptions and objectives of the course: The gaining of knowledge concerning design of prestressed structures.		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. A student knows the basic type of loads acting on shell covers, he knows analysis principles rotational shells and spheroidal shells whose performance is a complex state of stress. - [K_W01, K_W02, K_W04, K_W05, K_W14, K_W09, K_W14,] 2. A student knows different type of loads in design situations concerning prestressed structures. - [K_W01, K_W02, K_W04, K_W05, K_W14, K_W09, K_W14,] 3. A student knows principles of designing, dimensioning and reinforcing sections in prestressed structures. - [K_W04, K_W07, K_W09, K_W14] 4. A student knows principles of designing and dimensioning prestressed structures - [K_W07, K_W08, K_W11]		
Skills:		
1. A student is able to calculate loads acting on ground and underground shell structures. - [K_U01, K_U02, K_U03, K_U04] 2. A student is able to characterize different type of shell covers, liquid tanks, silos and he is able to calculate reinforcement. - [K_U02, K_U03] 3. A student is able to calculate losses of prestress and loads acting on sections in prestressed structures. - [K_U04, K_U05, K_U07, K_U08]		
Social competencies:		

1. A student understands the need of lifelong learning, is able to organize the learning process of others. - [K_K01, K_K02, K_K06]
 2. A student is able to cooperate and work in a group. - [K_K01]
 3. He correctly identifies and resolves problems associated with his profession. - [K_K07, K_K09]

Assessment methods of study outcomes

Credit in written form (exam) 1,5h
 Credit of projects
 Estimation of individual projects on the basis of calculation and structural drawings with a defence of submitted work
 Number of evaluation
 [%] (grade)
 100- 91 A excellent
 90- 75 B very good
 74- 65 C good
 64- 51 D sufficient
 < 50 E failed

Course description

1. Definitions.
2. Classification of prestressed structures.
3. Method of production.
4. Materials.
5. Anchorage.
6. Section of the prestressed beam.
7. Immediate losses of prestress for pre- and post-tensioning and time dependent lossess of prestress for pre- and post-tensioning.
8. Ultimate limit states and Serviceability limit states.

Basic bibliography:

1. Konstrukcje z betonu sprężonego ? Andrzej Ajdukiewicz, Jakub Mames, Polski Cement, Kraków 2004
2. PN-B-03264:2002 ? Konstrukcje betonowe żelbetowe i sprężone. Obliczenia statyczne i projektowanie
3. PN-EN 1992-1-1: wrzesień 2008 ? Eurokod 2. Projektowanie konstrukcji z betonu. Część 1-1: Reguły ogólne i reguły dla budynków.

Additional bibliography:

Result of average student's workload

Activity	Time (working hours)
1. Participation in lectures	10
2. Participation in design classes	10
3. Complete (at home) works involved in project	15
4. Participation in the consultations associated with the exercises and design classes	5
5. Preparing to the final test of lectures	15
6. Preparing to the final test of exercise classes	5

Student's workload		
Source of workload	hours	ECTS
Total workload	75	3
Contact hours	26	1
Practical activities	44	2
