

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Thin and Complex		Code 1010102111010111981
Field of study Civil Engineering Second-cycle Studies	Profile of study (general academic, practical) general academic	Year /Semester 1 / 1
Elective path/specialty Structural Engineering	Subject offered in: Polish	Course (compulsory, elective) obligatory
Cycle of study: Second-cycle studies	Form of study (full-time, part-time) full-time	
No. of hours Lecture: 30 Classes: - Laboratory: - Project/seminars: 30		No. of credits 3
Status of the course in the study program (Basic, major, other) major		(university-wide, from another field) from field
Education areas and fields of science and art technical sciences		ECTS distribution (number and %) 3 100%
Responsible for subject / lecturer: dr hab. inż. Maciej Szumigala prof. nadzw. email: maciej.szumigala@put.poznan.pl tel. 061 665 2401 Faculty of Civil and Environmental Engineering Piotrowo 5 Street, 60-965 Poznań		
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	- basic knowledge of strength of materials, structural analysis, construction materials, descriptive geometry, construction
2	Skills	- obtaining information from the standards and books - use of the computer programs which support designing
3	Social competencies	- responsibility - desire to expand knowledge
Assumptions and objectives of the course: Student can design simple steel elements which are tensile, compressed or bending. Student can design welding and bolted joints.		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. Know the rules of general design of construction - [K_W04] 2. Know the rules of design simple metal elements - [K_W07]		
Skills:		
1. Can combine the loads of buildings - [K_U02] 2. Can design selected metal elements - [K_U07] 3. Can determine the dimension of basic structural elements - [K_U08]		
Social competencies:		
1. Can work independently and in a team - [K_K01] 2. Student is responsible for the obtained results - [K_K02]		
Assessment methods of study outcomes		
Written exam at the end of course in the summer session. Pass of exercises based on the results of two tests (welding and bolted joints). Pass a project based on the project documentation, systematic work, talk about project.		
Course description		

The basic information about: production technology, strength, mechanical properties of steel which is used for structural elements. The basic methods of designing metal structures. The rules of designing welding and bolted joints. The basic information about structural designing, durability of structures, loads and structural reliability.		
Basic bibliography:		
Additional bibliography:		
Result of average student's workload		
Activity	Time (working hours)	
1. Lecture	30	
2. Exercises	15	
3. Project	15	
4. Prepare to test	6	
5. Calculation at home	24	
Student's workload		
Source of workload	hours	ECTS
Total workload	75	3
Contact hours	60	2
Practical activities	40	2
