Assessment methods of study outcomes

Receiving credit for seminar on the basis of:

- Assessment of the presentation on the technical topic,
- Assesment of presentation of own graduate work,

- Participation in the discussion

Course description

Reminding about general rules for carrying out the final exam and the preparation of a graduate work. Searching for an interesting topic from scientific - technical literature and developing it by every student and presenting it in the form of public presentation.

Preparation and presentation of the presentation of own graduate work.

Participation in the public debate after the presentation of the results of their own work and the work of other graduates.

Basic bibliography:

1. Construction standards and guides and manuals construction and building

Additional bibliography:

1. Scientific - technical magazines
