

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Physics of Buildings		Code 1010101141010110025
Field of study Civil Engineering First-cycle Studies	Profile of study (general academic, practical) general academic	Year /Semester 2 / 4
Elective path/specialty -	Subject offered in: Polish	Course (compulsory, elective) obligatory
Cycle of study: First-cycle studies	Form of study (full-time, part-time) full-time	
No. of hours Lecture: 15 Classes: 15 Laboratory: - Project/seminars: -		No. of credits 2
Status of the course in the study program (Basic, major, other) major		(university-wide, from another field) from field
Education areas and fields of science and art technical sciences Technical sciences		ECTS distribution (number and %) 2 100% 2 100%
Responsible for subject / lecturer: Barbara Ksit email: barbara.ksit@put.poznan.pl tel. 48 61 6653358 Civil and Environmental Engineering ul. Piotrowo 5, 60-965 Poznań		Responsible for subject / lecturer: Monika Siewczyńska email: monika.siewczynska@put.poznan.pl tel. 48 61 6653358 Civil and Environmental Engineering ul. Piotrowo 5, 60-965 Poznań
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	Basic knowledge of building materials, construction, physics and basic methods of mathematical analysis
2	Skills	Students can: use-programs Excel (basic features) identify and describe building materials and their basic physical characteristics, can provide a layer of individual partitions, understands the basic laws governing the flow of heat
3	Social competencies	Awareness of the need to constantly update and supplement knowledge construction and engineering skills. Understand the need for lifelong learning and knows how to interact and work in a group, taking the different roles.
Assumptions and objectives of the course: -Extending and deepening the knowledge of thermodynamics and hygrometry, to the course is to familiarize students with the methods of calculation of thermal and moisture barriers, and building research methods and termorenowacyjnymi, damp-proofing, drying buildings and restore the insulation.		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. She/He knows and understand the work of a thermal barrier, knows the method of calculation - - [[K_W02, K_W03, K_W04, K_W07]]		
2. She/He knows the research methods restoration, protection against moisture, drying buildings and restore the insulation. - - [[K_W02, K_W03, K_W04, K_W07]]		
3. She/He knows the basic principles of heat transfer, ventilation of the building, - - [[K_W02, K_W03, K_W04, K_W07]]		
4. She/He knows matriely and methods termorenowacyjjne partitions - [[K_W02,K_W03,K_W04,K_W07]]		
Skills:		
1. She/He can design a barrier (wall, roof etc) and calculate heat transfer coefficient - - [[K_U01, K_U018, K_U05]]		
2. She/He can choose the method of thermal renovation and waterproofing - - [[K_U01, K_U018, K_U05]]		
3. She/He can describe the phenomenon and analyze the causes of problems in the building mycological - - [[K_U01, K_U018, K_U05]]		
Social competencies:		
1. She/He is able to set priorities for the implementation of specific actions, - - [[K_U16, K_K05K_K01]]		
2. She/He is acquires the ability to work in a team, - - [[K_U16, K_K05K_K01]]		

Assessment methods of study outcomes		
<p>-Assessment of knowledge: activity during classes and a lectures. Points might be earned for: the activity during the classes, knowledge presented during the colloquium The grading scale determined% from: 90 very good (A) 85 good plus (B) 75 Good (C) 65 Adequate plus (D) 55 Sufficient 55 (E) Less than 54 inadequate (F)</p>		
Course description		
<p>-Lectures Fundamentals knowledge of heat transfer. Hygrothermal properties of materials construction. Calculation of thermal barriers. Calculation of thermal barriers with thermal bridges. flow Issues heat, thermal stability partitions. Causes and types which moisture in building, diffusion and condensation. Principles of design and performing divisions that meet the standard requirements for thermal protection and humidity of the building. Exercises: calculation of heat transfer coefficients for different partitions. Determination of co fRsi for the selected partition</p>

Dyzman: Budownictwo zrównoważone z elementami certyfikacji energetycznej. Dolnośląskie Wydawnictwo Edukacyjne, 2012 4. J. Jasiczak, M. Kuinski, M. Siewczyńska - Obliczanie izolacyjności termicznej i nośność murowanych ścian zewnętrznych. Wyd. Politechniki Poznańskiej 5. Hydroizolacje w budownictwie, Maciej Rokieł 2005 6. Nowoczesne wyposażenie domu jednorodzinne, praca zbiorowa pod red. prof. dr hab. inż. Halina Koczyk, PWRiL Poznań</p>		
Result of average student's workload		
Activity	Time (working hours)	
1. Preparing to pass the lecture	10	
2. Participation in lectures	15	
3. Prepare for Training	5	
4. Participation in cw. auditorium	15	
5. Complete in house calculation of cw. auditorium	3	
6. Preparing to pass the end of cw. auditorium	10	
7. Participation in the consultation (we assume that the student uses the three consultations)	3	
Student's workload		
Source of workload	hours	ECTS
Total workload	50	2
Contact hours	33	1
Practical activities	20	1
