

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Railroads		Code 1010101141010120153
Field of study Civil Engineering First-cycle Studies	Profile of study (general academic, practical) general academic	Year /Semester 2 / 4
Elective path/specialty -	Subject offered in: Polish	Course (compulsory, elective) obligatory
Cycle of study: First-cycle studies	Form of study (full-time, part-time) full-time	
No. of hours Lecture: 30 Classes: 15 Laboratory: - Project/seminars: 15		No. of credits 3
Status of the course in the study program (Basic, major, other) major		(university-wide, from another field) from field
Education areas and fields of science and art technical sciences Technical sciences		ECTS distribution (number and %) 3 100% 3 100%
Responsible for subject / lecturer: dr inż. Michał Pawłowski email: michal.pawlowski@put.poznan.pl tel. 61 665 24 07 Budownictwa i Inżynierii Środowiska ul. Piotrowo 5, 60-965 Poznań		
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	Basic knowledge from mathematics and physics required to solve tasks dealing with railroad construction. Knowledge and skills for drawing and reading geodesic maps, including drawing using CAD software. Knowledge of fundamentals of mechanics and strength of materials. Knowledge of fundamentals of soil mechanics. Knowledge of properties, scope of utilisation and investigations of construction materials.
2	Skills	Ability to choose tools for a design of a railway line. Ability to read technical drawing and geodesic maps. Ability to make a graphical documentation.
3	Social competencies	Competency of individual and group work under a given task. Being responsible for reliability of the executed work and the work's interpretation. Responsibility for personal and group safety. Cognition of a need to increase one's professional and personal competencies.
Assumptions and objectives of the course: Acquiring by the students basic knowledge and skills in the field of railroads necessary to design a fragment of a railway line and a track layout of a small station.		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. has basic knowledge about railway network and it's hierarchy - [K_W09] 2. knows rules governing a design of a railway line in plane and profile - [K_W10] 3. has basic knowledge about railroad superstructure and subgrade - [K_W14]		
Skills:		
1. can design a railway line and a railway station in plane and profile given uncomplicated terrain - [K_U08] 2. can propose a method for railroad drainage - [K_U20] 3. can execute rail traction calculations - [K_U20]		
Social competencies:		
1. is competent to work individually and in a group under a given task - [K_K01] 2. is responsible for reliability of work done and of the work's results interpretation - [K_K02] 3. states conclusions and describes results of own work - [K_K09]		

Assessment methods of study outcomes		
<p>Outcome of the lectures ? a written colloquium in the 15. week of the semester. Outcome of the classes ? a written colloquium in the 15. week of the semester. Outcome of the project ? a content related evaluation of the presented design, orderliness of work (according to a consultancy card and participation in projects), defence of the project (written or oral).</p>		
Course description		
<p>Lectures: Railway network and railway lines classification. Rules governing design of railroads in plane and profile. Basic elements of railroad?s superstructure and subgrade. Rules governing design of standard cross-sections. Rules governing construction of embankments and excavations and subgrade?s drainage. Track layout and work technology of small stations. Description of drag during train?s movement and traction calculations. Classes: Calculations for design of a railroad in plane. Calculations for design of a railroad in profile. Traction calculations. Projects: Preliminary design of a railroad in plane and profile. Preliminary design of a small station.</p>

Result of average student's workload		
Activity	Time (working hours)	
1. participation in lectures	30	
2. preparation to lectures colloquium	10	
3. participation in classes	15	
4. preparation to classes colloquium	7	
5. participation in projects	15	
6. project realisation outside project lessons	10	
7. participation in consultations	3	
Student's workload		
Source of workload	hours	ECTS
Total workload	75	3
Contact hours	63	2
Practical activities	40	2
