

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Mechanical Structures		Code 1010134231010130901
Field of study Environmental Engineering Extramural First-	Profile of study (general academic, practical) (brak)	Year /Semester 2 / 3
Elective path/specialty -	Subject offered in: Polish	Course (compulsory, elective) obligatory
Cycle of study: First-cycle studies	Form of study (full-time, part-time) part-time	
No. of hours Lecture: 14 Classes: 16 Laboratory: - Project/seminars: -		No. of credits 6
Status of the course in the study program (Basic, major, other) (brak)		(university-wide, from another field) (brak)
Education areas and fields of science and art		ECTS distribution (number and %)
Responsible for subject / lecturer: dr inż. Grzegorz Krzyżaniak email: grzegorz.krzyzaniak@put.poznan.pl tel. 616652034 Faculty of Civil and Environmental Engineering ul. Piotrowo 5 60-965 Poznań		Responsible for subject / lecturer: dr inż. Tomasz Kazmierski email: tomasz.kazmierski@put.poznan.pl tel. 616652079 Faculty of Civil and Environmental Engineering ul. Piotrowo 5 60-965 Poznań
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	Knowledge of selected topics in mathematics, physics, engineering mechanics, materials strength and thermodynamics
2	Skills	Use the knowledge to explain processes and phenomena in mechanical and flow devices
3	Social competencies	Awareness of the need to constantly update and supplement knowledge and skills Able to share their skills with people in the group
Assumptions and objectives of the course:		
1. Purchase by the students skills of resolving basic problems of mechanical strength in mechanical constructions 2. Getting to know with flow devices used in heating, ventilation and air conditioning.		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. Basic rules of calculation and selection of the most commonly used machine connections. - [-] - [-] 2. Types, principles and functions of valves used for cold and hot water. - [-] - [-] 3. Types, principles of operation, methods of selection and adjustment of pumps used for cold and hot water. - [-] 4. Types, principles and ways to adjust the fan in the ventilation and air conditioning - [-]		
Skills:		
1. Execution of construction drawings of single parts and assembly drawing of simple devices, - [-] 2. Execution of drawings of buildings in sections and rectangular projections in accordance with the applicable rules and graphical notations - [-] 3. . Execution of installation drawings on rectangular projection construction layouts as well as in axonometric - [-]		
Social competencies:		
1. The student understands the importance of engineering and its impact on the environment - [-] 2. The student is able to think and act in an enterprising way - [-] 3. The student is able to prioritize appropriately in carrying out tasks - [-]		
Assessment methods of study outcomes		

Lectures: Written final test		
Project: Execution and completion of design projects: 2 (typical mechanical constructions) + 1 (pumping station).		
Course description		
Mechanical loads and stresses. Fatigue strength. Uncoupled connections - welded and rivet connections, and coupled connections ? screw connections. The function of fittings. Shutoff valves, dampers and non-return valves. Control valves and safety valves ? construction, principles of functioning, application. Thermostatic valves - construction, principles of functioning, criterion of throttling. Types of pumps ? operation parameters: capacity, pumping pressure, power, efficiency. Pumping system ? geometrical and energy quantities. Cavitations in pumping systems. Characteristics of rotary pumps and their operating point. Parallel and series operation of pumps. Control of pumps capacity. Fans and blowers ? characteristics of devices, specific measures. Types of fans. Characteristics of centrifugal fans. Axial fans ? construction, velocity and pressure pattern, supply power. Control of axial fans.

Result of average student's workload		
Activity	Time (working hours)	
1. Participation in lectures	30	
2. Participation in project exercises	30	
3. Participation in project exercises	30	
4. Preparation (at home) for the project exercises	10	
5. Participation in consultations related to the project exercises	5	
6. Preparation for the final test	14	
7. Final test	1	
Student's workload		
Source of workload	hours	ECTS
Total workload	120	6
Contact hours	60	0
Practical activities	60	0
