

<b>STUDY MODULE DESCRIPTION FORM</b>		
Name of the module/subject <b>Systems of Wastewater Treatment</b>		Code <b>1010102221010130353</b>
Field of study <b>Environmental Engineering Second-cycle</b>	Profile of study (general academic, practical) <b>(brak)</b>	Year /Semester <b>1 / 2</b>
Elective path/specialty <b>Water Supply, Water and Soil Protection</b>	Subject offered in: <b>Polish</b>	Course (compulsory, elective) <b>obligatory</b>
Cycle of study: <b>Second-cycle studies</b>	Form of study (full-time, part-time) <b>full-time</b>	
No. of hours Lecture: <b>30</b> Classes: <b>15</b> Laboratory: <b>15</b> Project/seminars: <b>30</b>		No. of credits <b>6</b>
Status of the course in the study program (Basic, major, other) <b>(brak)</b>		(university-wide, from another field) <b>(brak)</b>
Education areas and fields of science and art <b>technical sciences</b> <b>Technical sciences</b>		ECTS distribution (number and %) <b>6 100%</b> <b>6 100%</b>
<b>Responsible for subject / lecturer:</b> dr inż. Zbysław Dymaczewski email: zbyslaw.dymaczewski@put.poznan.pl tel. 61 665 3662 Faculty of Civil and Environmental Engineering ul. Berdychowo 4, 60-965 Poznań		<b>Responsible for subject / lecturer:</b> dr inż. Tymoteusz Jaroszyński email: tymoteusz.jaroszynski@put.poznan.pl tel. 61 6652436 Budownictwa i Inżynierii Środowiska ul. Berdychowo 4, 60-965 Poznań
<b>Prerequisites in terms of knowledge, skills and social competencies:</b>		
1	<b>Knowledge</b>	Student should have a basic knowledge about water and wastewater technology, mathematics, chemistry, fluid mechanics and general knowledge from environmental engineering.
2	<b>Skills</b>	Student should be able to search valuable information and read research articles and reports with understanding. Student should be able to perform mathematical calculations, physical, chemical, mechanics of the fluids and calculation of equipment and facilities of water and wastewater treatment plants.
3	<b>Social competencies</b>	Awareness to constantly update and supplement knowledge and skills.
<b>Assumptions and objectives of the course:</b> -The objective of the course is to broaden the knowledge and skills scopes of wastewater technology necessary for the selection of technology methods of basic pollutants removal from municipal wastewater.		
<b>Study outcomes and reference to the educational results for a field of study</b>		
<b>Knowledge:</b>		
1. Student knows the technological systems of wastewater treatment depending on the wastewater characterization on influent and effluent - [ [K2_W03, K2_W04, K2_W07]]		
2. Student knows the design methods of basic technological processes and technological systems of wastewater treatment and sludge handling and disposal systems for waste and sludge produced at WWTP - [ [K2_W03, K2_W04, K2_W07]]		
3. Student understands basics of experiment in pre-design research of WWTP - [ [K2_W03, K2_W04, K2_W07]]		
4. Student knows the principles of mathematical modelling of wastewater treatment in activated sludge process, Activated Sludge Models, simulation project scheme - [ [K2_W03, K2_W04, K2_W07]]		
5. Student knows selected unit processes used in wastewater treatment and sludge handling - [ [K2_W03, K2_W04, K2_W07]]		
<b>Skills:</b>		

<p>1. Student can prepare the design concept of technology for municipal wastewater treatment plant - [[K2_U09, K2_U10]]</p> <p>2. Student can present a concept of sludge handling - [ [K2_U01, K2_U12, K2_U18]]</p> <p>3. Student can perform computer simulation of activated sludge biological wastewater treatment plant and properly interpret the results - [[K2_U01, K2_U12, ]]</p> <p>4. Student can conduct some experiments concerning wastewater treatment processes and provide interpretation of the obtained results - [[K2_U01, K2_U12, ]]</p> <p>5. Student can work in a team (measurements and elaboration of the obtained experimental data) - [[K2_U01, K2_U12, ]]</p>
<p><b>Social competencies:</b></p>
<p>1. Student understands the need for teamwork in solving theoretical and practical problems - [ [K2_K03]]</p> <p>2. Student understands the need of systematic deepening and broadening his/her competences - [[K2_K01]]</p>

<b>Assessment methods of study outcomes</b>
<p>- Lecture Attendance and lecture activity checkup Written finale exam</p> <p>- Exercises Written final test</p> <p>- Laboratory Short entrance written test before each laboratory Written report of each laboratory exercise Written final test regarding all exercises Activity evaluation during each laboratory</p> <p>- Design exercises Verification of project advancements and independent design work on each project Activity evaluation during each consultations Written report Written final exam regarding basic knowledge of WWTP design</p>
<b>Course description</b>
<p>- Lectures Wastewater transport and treatment systems. Guidelines for wastewater treatment system design. Factors affecting wastewater treatment process choice, Characterization of design quantity and quality of wastewaters. Laboratory and computer model investigation for design WWTP purposes. Process flow sheets, facilities arrangements and devices for wastewater treatment. Nutrient removal systems. Effectiveness of the systems. Reject water treatment systems at WWTP. Sludge handling and disposal systems. Odor control systems at WWTP. Basic information on wastewater treatment modeling. ASM models. WWTP computer simulation.</p> <p>- Exercises Calculations of hydraulic losses on WWTP objects (grit chambers, settling tanks etc.)</p> <p>- Laboratories 1. Biological phosphorus removal 2. Mechanical sludge dewatering 3. Biological nitrogen removal</p> <p>- Project 1. The design concept of technology municipal waste water treatment plant. 2. Computer simulation of a biological wastewater treatment plant with activated sludge process.</p>

<b>Result of average student's workload</b>		
<b>Activity</b>	<b>Time (working hours)</b>	
1. Lecture participation	30	
2. Laboratory participation	15	
3. Preparation for laboratory exercises	5	
4. Preparation of the laboratory report at home	15	
5. Exercises participation	15	
6. Project participation	30	
7. Project preparation at home	25	
8. Project and laboratory consultation with the instructor (Student is assumed to attend 2 consultations 30 min. each)	1 4	
9. Preparation for project and final examination	20	
10. Preparation for lecture final examination and final exam attendance		
<b>Student's workload</b>		
<b>Source of workload</b>	<b>hours</b>	<b>ECTS</b>
Total workload	160	6
Contact hours	91	3
Practical activities	60	3
