Prere	equisites in term	s of knowledge, skills and s	social competencies:		
1	Knowledge	Student recognizes the fundamental risks to health and life, which are associated with functioning at the University.			
2	Skills	The student is able to apply this knowledge during the whole process of studying.			
3	Social competencies	The student is capable of taking rea	sponsible action in emergenc	y situations.	
Assu	•	ectives of the course:			
		inted with the rules, regulations and	rules relating to safety, work I	nygiene and fire protection.	
		mes and reference to the ed	ducational results for	a field of study	
	vledge:			d a statu , first sid and land	
	a detailed knowledge	of the rules, the way and the scope ( 13]	of the occupational health and	d safety, first aid and legal	
2. Kno	ws the trends and con	nmon practices in terms of supervision	on of working conditions - [K1	A_W17]	
Skills	s:				
foreign	language accepted a	erpret data from literature, database s an international language of comm ustify opinions - [K2A_U01]			
2. Has	the self-study ability a	ind comprehends its importance - [h	<1A_U05]		
		ation to work in industrial environmer plication in practice - [K1A_U11]	nts and is familiar with safety	rules related to this work as wel	
	al competencies:				
qualific		d knows means how to self-study ( fir ving professional, personal and socia			
		of the study and understands non-tee on environment and taken responsibi			
3 Is fully aware of the responsibility that he has taken for his own work and expresses readiness to comply with the rules of					

Assessment methods of study outcomes						
Formative assessment:						
- on the basis of lecture: answers to questions about the material covered on current lectures.						
Collective assessment:						
- in terms of classes: written test, in which at least one answer is correct (answer is scored 0 or 1); credits will be given if a student has achieved at least 85% of all points						
Course description						
Selected legal legislation concerning occupational health safety and, including:						
a) the rights and obligations of students and universities in terms of occupational health and safety, and liability for infringement of the provisions and principles of health and safety at work,						
b) accidents and illnesses						
c) prevention with regard to the protection of the health of students.						
The impact of hazardous, harmful, and disruptive factors on safety and health. Risk assessment of factors which exist in learning and working processes and methods to protect against risks towards students? health and life. Problems that are linked to the organisation of workplace, taking into account ergonomic principles, as well as including work stations with screen monitors and other office equipment. The proceedings in the event of accidents and emergency (e.g. fire, failure), including rules of first aid in the event of an accident						
Basic bibliography:						
1. legal regulations concerning safety in colleges and universities						
Additional bibliography:						
Result of average student's workload						
Activity	Time (working hours)					
1. Participation in lectures	4					
Student's workload						
Source of workload	hours	ECTS				
Total workload	4	0				
Contact hours	4	0				
Practical activities	4	0
