Faculty of Electrical Engineering ul. Piotrowo 3a, 60-965 Poznań Prerequisites in terms of knowledge, skills and social competencies: 1 Knowledge Student knows basic notions in calculus. Student can operate a calculator. Student recognizes the necessity in deepening his knowledge. Social competencies Assumptions and objectives of the course: to acquire basic descriptive measures and develop the ability to use these measures to solve application problems. Study outcomes and reference to the educational results for a field of study Knowledge: 1. Student knows methods of sampling [K2A_W02] 2. Student knows measures of association between two variables [K2A_W02] 3. Student knows components of a time series and index numbers [K2A_W02] Skills: 1. Student is able to interpret the information from a sample and to draw conclusions [K2A_U8] Social competencies:		•	t.poznan.pl					
Prerequisites in terms of knowledge, skills and social competencies: 1 Knowledge Student knows basic notions in calculus. Skills Student can operate a calculator. Student recognizes the necessity in deepening his knowledge. competencies Assumptions and objectives of the course: to acquire basic descriptive measures and develop the ability to use these measures to solve application problems. Study outcomes and reference to the educational results for a field of study Knowledge: 1. Student knows methods of sampling [K2A_W02] 2. Student knows measures of association between two variables [K2A_W02] 3. Student knows components of a time series and index numbers [K2A_W02] Skills: 1. Student is able to interpret the information from a sample and to draw conclusions [K2A_U8] Social competencies:		` '	neering					
Skills Student knows basic notions in calculus. Skills Student can operate a calculator. Skills Student recognizes the necessity in deepening his knowledge. Competencies Assumptions and objectives of the course: to acquire basic descriptive measures and develop the ability to use these measures to solve application problems. Study outcomes and reference to the educational results for a field of study Knowledge: 1. Student knows methods of sampling [K2A_W02] 2. Student knows measures of association between two variables [K2A_W02] 3. Student knows components of a time series and index numbers [K2A_W02] Skills: 1. Student is able to interpret the information from a sample and to draw conclusions [K2A_U8] Social competencies:	ul. F	Piotrowo 3a, 60-965 P	oznań					
Skills Student can operate a calculator. Skills Student recognizes the necessity in deepening his knowledge. Assumptions and objectives of the course: to acquire basic descriptive measures and develop the ability to use these measures to solve application problems. Study outcomes and reference to the educational results for a field of study Knowledge: 1. Student knows methods of sampling [K2A_W02] 2. Student knows measures of association between two variables [K2A_W02] 3. Student knows components of a time series and index numbers [K2A_W02] Skills: 1. Student is able to interpret the information from a sample and to draw conclusions [K2A_U8] Social competencies:	Prere	equisites in term	s of knowledge, skills and	sc	ocial competencies:			
Skills Social Student recognizes the necessity in deepening his knowledge. Assumptions and objectives of the course: to acquire basic descriptive measures and develop the ability to use these measures to solve application problems. Study outcomes and reference to the educational results for a field of study Knowledge: 1. Student knows methods of sampling [K2A_W02] 2. Student knows measures of association between two variables [K2A_W02] 3. Student knows components of a time series and index numbers [K2A_W02] Skills: 1. Student is able to interpret the information from a sample and to draw conclusions [K2A_U8] Social competencies:	1	Knowledge	Student knows basic notions in ca	alcu	lus.			
Assumptions and objectives of the course: to acquire basic descriptive measures and develop the ability to use these measures to solve application problems. Study outcomes and reference to the educational results for a field of study Knowledge: 1. Student knows methods of sampling [K2A_W02] 2. Student knows measures of association between two variables [K2A_W02] 3. Student knows components of a time series and index numbers [K2A_W02] Skills: 1. Student is able to interpret the information from a sample and to draw conclusions [K2A_U8] Social competencies:	2	Skills	Student can operate a calculator.	tudent can operate a calculator.				
Study outcomes and reference to the educational results for a field of study Knowledge: 1. Student knows methods of sampling [K2A_W02] 2. Student knows measures of association between two variables [K2A_W02] 3. Student knows components of a time series and index numbers [K2A_W02] Skills: 1. Student is able to interpret the information from a sample and to draw conclusions [K2A_U8] Social competencies:	3		Student recognizes the necessity in deepening his knowledge.					
Study outcomes and reference to the educational results for a field of study Knowledge: 1. Student knows methods of sampling [K2A_W02] 2. Student knows measures of association between two variables [K2A_W02] 3. Student knows components of a time series and index numbers [K2A_W02] Skills: 1. Student is able to interpret the information from a sample and to draw conclusions [K2A_U8] Social competencies:	Assu	mptions and obj	ectives of the course:					
Knowledge: 1. Student knows methods of sampling [K2A_W02] 2. Student knows measures of association between two variables [K2A_W02] 3. Student knows components of a time series and index numbers [K2A_W02] Skills: 1. Student is able to interpret the information from a sample and to draw conclusions [K2A_U8] Social competencies:	to acq	uire basic descriptive	measures and develop the ability to	o us	se these measures to solv	e app	olication problems.	
1. Student knows methods of sampling [K2A_W02] 2. Student knows measures of association between two variables [K2A_W02] 3. Student knows components of a time series and index numbers [K2A_W02] Skills: 1. Student is able to interpret the information from a sample and to draw conclusions [K2A_U8] Social competencies:		Study outco	mes and reference to the e	edu	cational results for	a fi	eld of study	
2. Student knows measures of association between two variables [K2A_W02] 3. Student knows components of a time series and index numbers [K2A_W02] Skills: 1. Student is able to interpret the information from a sample and to draw conclusions [K2A_U8] Social competencies:	Knov	vledge:						
3. Student knows components of a time series and index numbers [K2A_W02] Skills: 1. Student is able to interpret the information from a sample and to draw conclusions [K2A_U8] Social competencies:	1. Stud	dent knows methods	of sampling [K2A_W02]					
Skills: 1. Student is able to interpret the information from a sample and to draw conclusions [K2A_U8] Social competencies:	2. Stud	dent knows measures	of association between two variable	es.	- [K2A_W02]			
Student is able to interpret the information from a sample and to draw conclusions [K2A_U8] Social competencies:			nts of a time series and index numb	ers.	[K2A_W02]			
Social competencies:						_		
·	·							
		•			TIAN IAI			
Student is able to argue the necessity of continuous learning [K2A_K1]	1. Stud	dent is able to argue t	ne necessity of continuous learning	ļ	[KZA_K1]			

Assessment methods of study outcomes						
Forming score:						
on the basis of written tests.						
Summary score:						
the average points obtained by the written tests.						
Course description						

Faculty of Engineering Management

Graphical descriptions of data.

Measures of location . Measures of variability.

Crosstabulations and scatter diagrams.

Correlation and simple linear regression.

Time series, forecasting, and index numbers.
