| Prere   | quisites in term  | s of knowledge, skills and   | a se  | ocial competencies:   |       |   |  |  |
| 1   | Knowledge   | He knows the selected methods and tools for the description, including the techniques of data collection and modeling social structures and processes within them. |   |   |       |   |  |  |
| 2   | Skills  |  | halyze the causes and processes and social phenomena, formulate their he subject and put simple hypotheses and verify them. |   |       |   |  |  |
| 3   | Social competencies   | Able to prioritize appropriately for implementation specified by you or other tasks.   |   |   |       |   |  |  |
| Assu  | mptions and obj   | ectives of the course:   |   |   |       |   |  |  |
|   |   | edge of the methodology of the deathed the field of research methods and   |   |   | ous f | ields of technology, service                |  |  |
|   | Study outco   | mes and reference to the   | ed  | ucational results for                                       | ' a f | ield of study                               |  |  |
| Know  | /ledge:   |  |   |   |       |   |  |  |
|   | nows the depth deper<br>- [K1A_W02]   | nding on the characteristics found   | in th   | e work process and knows                                    | s the | importance of Engineering                   |  |  |
| 2. He knows the relationship between a given discipline and other disciplines - [K2A_W13]   |   |  |   |   |       |   |  |  |
|   |   | nship existing in solving simple er  | ngine   | eering tasks - [K1A_W01]                                    |       |   |  |  |
| Skills  | :   |  |   |   |       |   |  |  |
| 1. It can use information and communication technology for the tasks typical of engineering - [T2A_U01]   |   |  |   |   |       |   |  |  |
| 2. It can create a proposal to use new developments (techniques and technologies) in the subject being studied - [K2A_U12]  |   |  |   |   |       |   |  |  |
| 3. Has the ability to understand and analyze social phenomena, enhanced by the ability to in-depth theoretical evaluation of these phenomena in selected areas, using the test method - [T2A_U08]   |   |  |   |   |       |   |  |  |
|   | Il competencies:  | · · · · · · · · · · · · · · · · · · ·  | · / \_  |   |       |   |  |  |
| 1. Is av  | vare of the importance  | of behavior in a professional mar<br>ows and cultures - [T2_U15]   | nner  | and comply with the rules                                   | of p  | rofessional ethics and                      |  |  |
| <ol> <li>He can suggest improvements (improve) the existing technical solutions specific to the Engineering Safety - [T2_U16]</li> <li>Able to characterize the typical engineering technologies in the field of Safety Engineering - [T2_U18]</li> </ol> |   |  |   |   |       |   |  |  |

# Assessment methods of study outcomes

W02, W05, W06 tested mainly on the basis of written work.

Other effects tested in practical classes.

## **Course description**

General characteristics of the design and operating system designs. The phases of the production process. The division of the work process into its constituent parts. The study ways of working. Principles of economics working movements. Teamwork. Physical and mental workload and its organizational forms. Design time and human biological rhythm. Operating environment and its diagnosis. The specificity of human tasks in the techniques of production, services and labor in conceptual and office space. Design principles humanized forms of work organization.

## Basic bibliography:

1. Niezawodność człowieka w interakcji z procesem przemysłowym, Sławińska M., WPP, Poznań 2012

2. Ergonomia w projektowaniu stanowisk pracy. Podstawy teoretyczne, Górska E., Tytyk E., Oficyna Wydawnicza Politechniki Warszawskiej, Warszawa, 1998

3. Eksploatacja systemów technicznych, Kaźmierczak J., Wydawnictwo Politechniki Śląskiej, Gliwice, 2000

## Additional bibliography:

1. Badanie metod i normowanie pracy. Wołk R., Strzelecki J.T., Wyd. Politechniki Warszawskiej, Warszawa 1993

Diagnoza ergonomiczna stanowisk pracy, Górska E., Oficyna Wydawnicza Politechniki Warszawskiej, Warszawa, 1998
 Organizacja pracy na stanowiskach roboczych, Matczyński F., WNT, Warszawa, 1998

# Result of average student's workload

| Activity   | Time (working<br>hours) |      |
|--|-------------------------|------|
| 1. Participation in lectures                           |                         | 8    |
| 2. Participation in classes                            | 12                      |      |
| 3. Participation in project classes                    | 8                       |      |
| 4. Preparation for classes                             | 4                       |      |
| 5. Preparation for project tasks                       | 4                       |      |
| 6. Preparation for written credits (based on lectures) |                         | 6    |
| 7. Overview of results (lectures)                      | 2                       |      |
| 8. Overview of results (classes)                       | 2                       |      |
| 9. Presentation of the semester project                | 2                       |      |
| Student's wo   | orkload                 |      |
| Source of workload                                     | hours                   | ECTS |
| Total workload   | 48                      | 2    |
