		STUDY MODULE DE	SCRIPTION FORM	1
Name of the module/subject Occupational diseases				Code 1011102221011128836
Field of			Profile of study	Year /Semester
Safe	ety Engineering -	Full-time studies - Second	(general academic, practical (brak)	1/2
Elective path/specialty Ergonomics and Work Safety			Subject offered in: Polish	Course (compulsory, elective)
Cycle c	of study:		Form of study (full-time,part-time)	
.,		ycle studies		time
No. of I		,		No. of credits
Lectu		s: 15 Laboratory: -	Project/seminars:	- 2
Status		program (Basic, major, other)	(university-wide, from another	field)
		(brak)		(brak)
Educat	ion areas and fields of sci	ence and art		ECTS distribution (number and %)
tech	nical sciences			2 100%
	Technical scie	ences		2 100%
em tel.	nż. Małgorzata Wejma ail: malgorzata.wejmar +48 61 665 3406 culty of Engineering Ma	n@put.poznan.pl		
	Strzelecka 11 60-965 F	-		
Prere	equisites in term	s of knowledge, skills and	social competencies	:
1	Knowledge	The student has knowledge of ergonomics in technology, ecology, basics of diagnosing and ergonomic design as well as occupational.		
2	Skills	The students can interpret relationships occurring in the system of human-technical object, organize work that causes minimal workload ensures security.		
3	Social competencies	The student is aware of the social to apply occupational safety princi		raduate, and of predispositions
Assı	imptions and obj	ectives of the course:		
work o in des	on human health. Teac ign. The knowledge an capabilities of the hum	detailed knowledge of the theoretica thing how to prevent the negative co ad skills should enable students to in han body and to ensure health. mes and reference to the e	nsequences of excessive wo dependently implement corr	orkload. The use of acquired skil ective actions for adapting work
Kno	-			a neid of Study
	wledge:	torization of donordanaica within -		2011
	•	terization of dependencies within a dencies within the scope of a given	• • • • •	וואנ
	•	cepts for the discipline [[K2A_W0		
		lopment of the discipline [[K2A_W		
		within the discipline [[K2A_W13]]		
		ational health and safety [[h	(2A_W21]]	
Skill	S:			
	dent can apply informa	comprehends it - [[K2A_U5]] ation-communicative techniques to d	eal with tasks that are typica	al of engineering activity
3. Has	s got the preparation th	at is indispensable to be able to wo along with the ability to impose thei		
4. Stu for Sa	dent can, according to fety Engineering, wile t	a given specification, design and op using appropriate methods, techniqu neering (including some uncommon	perate simple equipment, objues and tools, as well as solv	ect, system or a process, typica /e complex engineering tasks,

Social competencies:

1. Understands the need and knows means how to self-study (first, second and third cycle studies, postgraduate studies, qualification courses)- improving professional, personal and social competence; can argument the need to learn for the whole life. - [[K2A_K1]]

2. Student is fully aware of the responsibility that he has taken for his own work and expresses readiness to comply with the rules of team work as well as responsibility for mutually realized and completed tasks. - [[K2A_K3]]

3. Can determine some causal relationships in the process of targets implementation and rank pertinence of alternative or competitive tasks. - [[K2A_K4]]

Assessment methods of study o	outcomes				
-Oral and written exam; evaluation of written assignments presented during classical and written examples and the second	SSES.				
Course description					
- The historical development of occupational health.					
- Possibilities of human psycho-physical, chemical and biological occupational environment.					
-The tolerance limits of the human body: hygienic evaluation of working condition profession.	ons, occupational dise	eases and related to his			
- Risk factors in the work environment, somatic and psychological reactions of t - Fatigue and rest.	he human body to the	ese risks.			
- Physiological principles for the organization of shift work.					
- Working conditions of women and the elderly.					
- Technical and organizational development of the welfare conditions.					
- Standards for determining allowable changes in the work environment, ie thos human body.	e that allow the funct	ional balance of the			
- The law concerning the health protection of the working man.					
Basic bibliography:					
1. Koradecka D., (red), Bezpieczeństwo pracy i ergonomia (Occupational safety 1999	y and ergonomics), W	/yd. CIOP, Warszawa			
2. Wejman M., Higiena pracy (Work hygiene), Wyd.Politechniki Poznańskiej, Po	oznań 2012				
Additional bibliography:					
1. Norms, standards, regulations specified by the lecturer.					
Result of average student's wo	orkload				
Activity		Time (working hours)			
1. Participation in lectures		15			
2. Participation in classes	15				
3. Preparation for classes and report preparation	30				
4. Preparation for oral and written exam	15				
5. Review of exam results	4				
Student's workload					
Source of workload	hours	ECTS
