| Study outcomes and reference to the educational results for a field of study                                                                                                                                                     |                     |                                     |                                                         |                                                                  |      |                                             |  |  |
| Knowledge:           1. has an extensive knowledge of the role of a human in forming of the organizational culture and ethics in management [ [K2A_W06]]                                                                         |                     |                                     |                                                         |                                                                  |      |                                             |  |  |
| 2. knows the methods and tools of modeling of decision-making processes - [[K2A_W09]]                                                                                                                                            |                     |                                     |                                                         |                                                                  |      |                                             |  |  |
| Skills:                                                                                                                                                                                                                          |                     |                                     |                                                         |                                                                  |      |                                             |  |  |
| 1. can properly interpret and explain the social, cultural, political, law, economic phenomenon and relationships between social phenomenon - [[K2A_U01]]                                                                        |                     |                                     |                                                         |                                                                  |      |                                             |  |  |
| 2. can use the theoretical knowledge to describe and analyze the cause of the processes and social phenomenon and can formulate their own opinions and select critical data and methods of analyzes - [[K2A_U02]]                |                     |                                     |                                                         |                                                                  |      |                                             |  |  |
| 3. efficiently uses the normative systems, standards and rules or can use them to solve the problems, has an extended ability in relation to the selected category of the social bond or selected type of standard - [[K2A_U05]] |                     |                                     |                                                         |                                                                  |      |                                             |  |  |
| 4. can use the acquired knowledge in different scopes and forms, extended to critical analysis of the effectiveness and usefulness of used knowledge - [[K2A_U06]]                                                               |                     |                                     |                                                         |                                                                  |      |                                             |  |  |
| Social competencies:                                                                                                                                                                                                             |                     |                                     |                                                         |                                                                  |      |                                             |  |  |
| 1. can notice the relationship of cause and effect in the realization of goals and rank the significance of alternative or competitive tasks - [[K2A_K03]]                                                                       |                     |                                     |                                                         |                                                                  |      |                                             |  |  |
| 2. has the conscious of interdisciplinarity of knowledge and skills required to solve complex problems of organizations and the need to create interdisciplinary teams - [[S2A_K06]]                                             |                     |                                     |                                                         |                                                                  |      |                                             |  |  |

## Assessment methods of study outcomes

A written exam.

## **Course description**

-The genesis, subject and division of the qualitology. Basis of terminology. Characteristic and classification of universal features. Basic operations on quality categories. The principle of the quality approach. The methodology of the quality approach to the research and forming of items.

## **Basic bibliography:**

1. Elementy kwalitologii, Mantura W., Wyd. Politechniki Poznańskiej, Poznań 2010.

2. Zarządzanie jakością - teoria i praktyka, Hamrol A., Mantura W., , Wyd. Naukowe PWN, Warszawa, 2002

3. Elementy teorii jakości. , Borys T, PWN, Warszawa, 1980

## Additional bibliography:

1. Ilościowe określanie jakości, Kolman R, PWE, Warszawa, 1973

2. Teoretyczne podstawy projektowania produkcyjnych systemów sterowania jakością, Mantura W, Wyd. Ucz. Politechniki Poznańskiej, Poznań, 1990
