

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Introduction to Econometrics		Code 1011104461011130552
Field of study Logistics - Part-time studies - First-cycle	Profile of study (general academic, practical) (brak)	Year /Semester 3 / 6
Elective path/specialty -	Subject offered in: Polish	Course (compulsory, elective) elective
Cycle of study: First-cycle studies	Form of study (full-time,part-time) part-time	
No. of hours Lecture: 16 Classes: - Laboratory: - Project/seminars: -		No. of credits 3
Status of the course in the study program (Basic, major, other) (brak)		(university-wide, from another field) (brak)
Education areas and fields of science and art social sciences Economics		ECTS distribution (number and %) 3 100% 3 100%
Responsible for subject / lecturer: dr Tomasz Brzęczek email: tomasz.brzeczek@put.poznan.pl tel. 61 665 33 92 Wydział Inżynierii Zarządzania ul. Strzelecka 11 60-965 Poznań		
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	Student knows economics terms and laws.
2	Skills	Student can use computer and Excel.
3	Social competencies	Student can work in a team to prepare a project.
Assumptions and objectives of the course: C1 Acquiring knowledge about statistical methods of economics model estimation. C2 Working out skills of estimation and verification of an economic model. C3 Working out skills of interpretation of estimated economic parameters and and their usage in forecasting and simulating.		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. Student knows Econometrics and its terms and typical economic models. - [K1A_W04] 2. Knows ordinary and generalised least squares methods (OLS, GLS). - [K1A_W04] 3. Knows linear and not-linear models. - [K1A_W04] 4. Knows problem of statistical significance problem. - [K1A_W04] 5. Knows analytical and smoothing methods of estimation. - [K1A_W04] 6. Knows forecast theory and its terms (forecast term, process and rules, error ex ante and ex post, accuracy)). - [K1A_W26]		
Skills:		
1. Student can explain an economic model and its parameters. - [K1A_U09] 2. Student can estimate and verify significance of economic model with OLS and GLS method. - [K1A_U09] 3. Can estimate using Excel and GRETL software. - [K1A_U07] 4. Can assess statistical significance and fitness of model to data. - [K1A_U15] 5. Can calculate a forecast or simulation and their errors ex ante and ex post. - [K1A_U05] 6. Understands and uses economic models and parameters. - [K1A_U05]		
Social competencies:		

- | |
|---|
| 1. Student is conscious about role and meaning of economic parameters and models estimation. - [K1A_K01]
2. Promotes forecasting in management.. - [K1A_K06]
3. Is ready to work in forecasting team. - [K1A_K03] |
|---|

Assessment methods of study outcomes

Forming mark:

- a) on a basis of questions concerning worked over problems

Summary mark:

- a) on a basis of written test of tasks solving (2 tasks with 10 points each and third task with 5 points). Pass requires 50% of all points.

Course description

- Econometrics and its basic terms. Econometric model and its terms.
- Model estimation and verification with OLS method. Model function, ordinary least squares method (OLS) and its assumptions, determination coefficient R², Statistical significance test. Forecast and its error. Residuals series test.
- Linear model with many determinants.
- Forecast theory and terms. Forecast term, rule and error ex ante and ex post, accuracy.
- Examination of autocorrelation and unity roots. Stationary series forecasting (average and autoregression) and non-stationary variance forecasting (naive method, moving average, exponential smoothing).
- Trends. Linear and non-linear. Residuals autocorrelation.
- Seasonality effects. Additive (mechanical and seasonal dummies method) and multiplicative (seasonality indices).
- Case of revenue forecasting with software assistance.
- Smoothing models with trends: Holt's and Winters'.
