

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Ecologistics		Code 1011101451011142999
Field of study Logistics - Full-time studies - First-cycle studies	Profile of study (general academic, practical) (brak)	Year /Semester 3 / 5
Elective path/specialty -	Subject offered in: Polish	Course (compulsory, elective) obligatory
Cycle of study: First-cycle studies	Form of study (full-time, part-time) full-time	
No. of hours Lecture: 15 Classes: - Laboratory: 15 Project/seminars: -		No. of credits 3
Status of the course in the study program (Basic, major, other) (brak)		(university-wide, from another field) (brak)
Education areas and fields of science and art		ECTS distribution (number and %)
Responsible for subject / lecturer: dr inż. Magdalena Graczyk email: jan.jablonski@put.poznan.pl tel. 61 665 34 08 Wydział Inżynierii Zarządzania ul. Strzelecka 11, 60-965 Poznań		Responsible for subject / lecturer: dr inż. Magdalena Graczyk email: magdalena.graczyk@put.poznan.pl tel. 61 665 33 95 Wydział Inżynierii Zarządzania ul. Strzelecka 11, 60-965 Poznań
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	Has basic knowledge of environmental protection, logistics and organization and management sciences.
2	Skills	Can Interpret and describe: phenomena that affect the company, its logistic processes and environmental protection. Can assess the manner of achieving goals while maintaining good relationships with partners and co-workers.
3	Social competencies	Is aware of his/her knowledge of logistics, environmental protection and organization and management sciences and understands and analyses related basic social phenomena.
Assumptions and objectives of the course: The aim of the course is to familiarize students with the nature, objectives and methods of completing ecologically-oriented logistic processes and systems of pro-ecological management of production processes		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. Has a basic knowledge of computer science (information technology), economics and transportation, production management, systems design and ecologistics - [K1A_W10] 2. Knows the basic relationship existing in the logistics and the specific issues (ecologistics) and environmentally friendly supply chain management - [K1A_W14] 3. Can recognize the basic phenomena characteristic of logistics and ecologistics and environmentally friendly production processes management - [K1A_W16] 4. Can make basic relations existing in the logistics, ecologistics and pro-ecological production management - [K1A_W18] 5. Can describe best practices in the management of ekologistykiecologistics and pro-ecological supply chain management - [K1A_W20]		
Skills:		

<p>1. Can search on the basis of literature and other sources and present in orderly way information on the issue falling within the ekologistics and environmentally friendly supply chain management - [K1A_U01]</p> <p>2. Can present with appropriate means issue falling within the ekologistics relating to environmental protection and logistics - [K1A_U02]</p> <p>3. Has the necessary preparation to work in an industrial environment, and know safety rules for the job in safety problems in ekologistics - [K1A_U11]</p> <p>4. Able to assess in economic terms specific problem, which forms part of ekologistics and environmentally friendly supply chain management - [K1A_U12]</p> <p>5. Can make a critical analysis of the phenomenon within the ekologistics and environmentally friendly supply chain management - [K1A_U13]</p> <p>6. Can design using appropriate methods and techniques for building such a system or process that meets the requirements within the general framework within ekologistics and environmentally friendly supply chain management - [K1A_U16]</p>
<p>Social competencies:</p> <p>1. Is aware of his/her knowledge and skills in the area of environmental protection and logistics, and understands the need for continuous improvement - [K1A_K01]</p> <p>2. Is aware of the importance of eco-friendly approach in management and daily life in maintaining and developing social and economic bonds at different levels - [K1A_K02]</p> <p>3. Is prepared to actively participate in groups and organizations undertaking activities related to environmental protection and recycling of waste materials in the economy - [K1A_K03]</p> <p>4. can correctly identify and resolve the dilemmas associated with the profession of logistics in the ekologistyki - [K1A_K05]</p>

Assessment methods of study outcomes	
<p>Forming assesment</p> <p>a) the project- discussion on solutions that wants to propose in the project b) a lecture on the basis of answers to questions concerning the material discussed in the previous lecture</p> <p>summary assesment</p> <p>- labs a) based on a public presentation of the results and discussion about them, b) on the basis of the substantive quality of the written raport</p> <p>- in a lecture at the public presentation on a given topic and answer questions concerning the material discussed in the lecture</p>	
Course description	
<p>The course covers the following topics:</p> <ol style="list-style-type: none"> 1) The Framework eco-logistics. 2) Logistics orientation on waste management system. 3) The processes of recycling waste materials in the economy. 4) Ecological balances in logistic systems. 5) Logistics of communal waste disposal. 6) Design of recycling-oriented products. 7) Environment-friendly management systems. 8) Environmental aspects of transport policy of the European Union
