	STUDY MODULE D	ESCRIPTION FORM		
Name of the module/subject Technology of Concrete		Code 1010101131010111404		
Field of study		Profile of study (general academic, practical)	Year /Semester	
Civil Engineering First-cycle Studies		(brak)	2/3	
Elective path/specialty		Subject offered in: Polish	Course (compulsory, elective) obligatory	
Cycle of study:		Form of study (full-time,part-time)		
First-cycle studies		full-time		
No. of hours			No. of credits	
Lecture: 15 Classe	s: - Laboratory: 15	Project/seminars:	2	
Status of the course in the study		(university-wide, from another field		
	(brak)	(bi	rak)	
Education areas and fields of science and art			ECTS distribution (number and %)	
technical sciences			2 100%	
Dr hab. inż. Krzysztof Zie email: krzysztof.zielinski tel. 61 665 21 68 Faculty of Civil and Envir ul. Piotrowo 5, 60-965 Pc	⊉put.poznan.pl onmental Engineering			
Prerequisites in tern	ns of knowledge, skills and	d social competencies:		
1 Knowledge	Basic knowledge of the following subjects: mathematic, physics, chemistry. Knowledge concerning classification and assessment of construction materials.			
2 Skills		obtain information from literature and other sources. Capability to select optimum naterial for a particular building/ structure.		
3 Social competencies	Understanding the need to continue education throughout the professional career. Understanding the necessity of co-operation and team work.			
Assumptions and ob	jectives of the course:			
	wledge regarding design of concre ving out standard concrete work.	te mixes, classification and scope	of applications in	
Study outco	omes and reference to the	educational results for a	field of study	
Knowledge:				
	ciples of designing concrete mixes			
	on materials used with concrete (th		• • • •	
	bles of preparing, transporting and	applying concrete mix - [[K_W12,	K_W14]]	
Skills:		411		
	d concrete works - [[K_U20, K_U2		20 K 1 2111	
-	r making common concrete meetin ry tests of aggregates and cements		20, 1(_021]]	
Social competencies

Assessment methods of study outcomes

Lectures:

- oral or written test,

Laboratory classes:

- oral test of knowledge before the start of laboratory classes,

- preparation and defence of concrete mix,

- final test after completing the classes.

Course description

Lectures

Basic information on standardization and classification of cement concrete types. Concrete composition/ ingredients, properties of concrete mix and hardened concrete. Methods of designing concrete composition. Basic technological processes connected with preparation, transport, application and maintenance of concrete. Quality control of concrete. Admixtures (division, study methods, evaluation and discussing major varieties). Additives (ashes, bits, complex admixtures). Design of concrete with additives and admixtures, concrete application at low temperatures, application of large masses of concrete. Special concretes. Light concrete (distribution, application, basic components). Basic principles of lightweight concrete design.

Laboratory classes

Design of concrete mix (one of the four methods) with selected characteristics of consistency and strength class. Study of ingredients (aggregates, cement, water) with focus on suitability (compliance with relevant standards) to make concrete. Preparation of concrete mix. Study of basic characteristics of the mix (texture, volume) preparation of concrete samples. Testing the impact of various types of additives on the mix characteristics (plasticizing, binding time). Study of the compressive strength of concrete by destructive method. Determining the actual strength of the designed concrete.

Basic bibliography:

1. Jamroży Z., Beton i jego technologie, Warszawa ? Kraków, Wydawnictwo Naukowe PWN 2000

2. Zieliński K., Podstawy technologii betonu, Wydawnictwo Politechniki Poznańskiej, Poznań 2012

Additional bibliography:

1. Neville A. M., Właściwości betonu, Kraków, Stowarzyszenie Producentów Cementu 2012

2. Szymański E., Materiałoznawstwo budowlane z technologią betonu, cz. 2, Warszawa, Oficyna Wydawnicza Politechniki Warszawskiej 1999

3. Technical magazines dealing with concrete technology, the Internet.

Result of average student's workload

Activity	Time (working hours)
1. participation in lectures	15
2. participation in laboratory classes.	15
3. preparation/ revision for laboratory classes	10
4. designing concrete mix composition (in volume and quality terms) ? during classes and at home	10
5. participation in consultations	5
6. preparation/ revision for summary test and presence during the test	10

Student's workload

Source of workload	hours	ECTS
Total workload	50	2
Contact hours	35	2
Practical activities	25	1
