

<b>STUDY MODULE DESCRIPTION FORM</b>		
Name of the module/subject <b>Technology and maintenance of railway superstructure</b>	Code <b>1010101171010124819</b>	
Field of study <b>Civil Engineering First-cycle Studies</b>	Profile of study (general academic, practical) <b>general academic</b>	Year /Semester <b>4 / 7</b>
Elective path/specialty -	Subject offered in: <b>Polish</b>	Course (compulsory, elective) <b>elective</b>
Cycle of study: <b>First-cycle studies</b>	Form of study (full-time,part-time) <b>full-time</b>	
No. of hours Lecture: <b>30</b> Classes: - Laboratory: - Project/seminars: -	No. of credits <b>4</b>	
Status of the course in the study program (Basic, major, other) <b>major</b>	(university-wide, from another field) <b>from field</b>	
Education areas and fields of science and art <b>technical sciences</b> <b>Technical sciences</b>	ECTS distribution (number and %) <b>4 100%</b> <b>4 100%</b>	

**Responsible for subject / lecturer:**

Michał Pawłowski, DSc Eng  
 email: MICHAL.PAWLOWSKI@PUT.POZNAN.PL  
 tel. +48 61 665 2407  
 Faculty of Civil and Environmental Engineering  
 ul. Piastowa 5 60-965 Poznań

**Prerequisites in terms of knowledge, skills and social competencies:**

1	<b>Knowledge</b>	Knowledge from mathematics and physics required to solve tasks dealing with railroad construction. Knowledge and skills for reading construction drawings. Knowledge of properties, scope of utilisation and investigations of construction materials. Principles of design and analysis of railway construction.
2	<b>Skills</b>	Ability to design railway lines. Ability to read construction drawings. Ability to conduct experiments leading to assessment construction materials quality.
3	<b>Social competencies</b>	Competency of individual and group work under a given task. Being responsible for reliability of the executed work and the work's interpretation. Responsibility for personal and group safety. Cognition of a need to increase one's professional and personal competencies.

**Assumptions and objectives of the course:**

Acquiring by the students basic knowledge and skills in the field of technology of construction and maintenance of railways.

**Study outcomes and reference to the educational results for a field of study**

**Knowledge:**

- has knowledge about rules of planning maintenance of railway lines - [K\_W14]
- knows the technologies of construction and maintenance of railways - [K\_W14]
- knows way of organizing the construction process and carrying out works safely - [K\_W15]

**Skills:**

- is able to plan maintenance works - [K\_U16]
- is able to apply the appropriate technology according to the needs of the railway line maintenance, - [K\_U21]
- is able to assess the risks during maintenance works - [K\_U16]
- is able to organize railway maintenance works of railway lines according to the principles of technology and organization - [K\_U21]

**Social competencies:**

- is competent to work individually and in a group under a given task - [K\_K01]
- is responsible for reliability of work done and of the work's results interpretation - [K\_K02]
- states conclusions and describes results of own work - [K\_K09]

<b>Assessment methods of study outcomes</b>		
Outcome of the lectures ? a written colloquium - checking master the knowledge presented in the lectures. Graduation from 51%.		
<b>Course description</b>		
Lectures: Learning method - lecture / problem lecture / lecture with multimedia presentation Maintenance, current and main repairs of railway superstructure and subgrade; Machinery and equipment for track works; Basic technological processes of repairs of railway superstructure and subgrade; Technology of construction of railway lines; Safety rules during works on open railway lines..

<b>Result of average student's workload</b>		
<b>Activity</b>	<b>Time (working hours)</b>	
1. participation in lectures	30	
2. current preparation to the lectures (replays)	10	
3. own study using the indicated literature and online resources	45	
4. consultations	1	
5. preparation to lectures colloquium	14	
<b>Student's workload</b>		
<b>Source of workload</b>	<b>hours</b>	<b>ECTS</b>
Total workload	100	4
Contact hours	31	1
Practical activities	1	1
