1	Knowledge	Basic knowledge in physics and mathematics (basic level of elementary and secondary school)
2	Skills	Skills in solving of elementary problems of physics on the basis of personal knowledge and information from known sources
3	Social competencies	Understanding of the necessity of the broadening of the self -competence and readiness to cooperate in group
Assumptions and objectives of the course: As a result of teaching general physics course at the University of Technology one ought expect good background in physics as outcome giving a base for the logical presentation and understanding technical problems.		
Study outcomes and reference to the educational results for a field of study		
Knowledge: 1. give definitions of the basic physical formulas and examples of their application - [[K_ W02]] 2. explain the basic physical laws and explain conditions for their application - [[K_ W02]] 3. explain the goal and the significance of the models in the explanation of the physical phenomenons - [[K_ W02]]		
Skills: 1. apply the basic physical laws and simple models in the solving of the uncomplicated problems - [K_U01] 2. use the literature and also other sources of knowledge - [K_U05]
