| The aim of the course is to learn construction, programming methods and typical applications of programmable controllers (PLC) and industrial regulators. Student at the end of training should be able to design and program systems with PLC. Students can also choose properly the industrial regulators to a particular object technology. Assessment methods of study outcomes

 $\label{lecture:assessment} \mbox{Lecture: Assessment of the lecture is written exam of based on design case solution.}$

Laboratory: Assessment of laboratory requires doing indicated exercises and giving reports.

Course description

Faculty of Electrical Engineering

Classification and field of application of programmable controllers. PLC hardware: controller architecture, input and output modules, function blocks, PLC family. Elements of controllers equipment: sensors, actuators. Typical properties and applications of sensors: mechanical, inductive, capacitive, ultrasonic and optical. Integrated sensor for temperature, pressure, level and other process parameters. PLC programming according to IEC 61131. Programming Languages: function blocks, ladder logic, sequential functional chart, structured text. Implementation of typical structures of automation. Operator panels. Analysis of algorithms used in industrial controllers. Controller tuning methods. Practical issues for regulators use different facilities. Laboratory exercises illustrate the issues discussed during the lectures.

Basic bibliography:

- 1. Lecture materials provided by the teacher in electronic form
- 2. Hugh Jack, P.Eng. Michigan, USA: Automating Manufacturing Systems with PLCs (free on-line access)
- 3. Brock S. i in: Sterowniki programowalne, , Wydawnictwo Politechniki Poznańskie
- 4. Legierski T. Programowanie sterowników PLC, Wydawnictwo Pracowni Komputerowej Jacka Skalmierskiego, Gliwice, 1998.

Additional bibliography:

- 1. Technical documentation PLC and industrial controls manufacturers
- 2. Pietrusewicz K.. Skoczowski S., Osypisk R.: Odporna regulacja PID o dwóch stopniach swobody
- 3. Kasprzyk J.: Programowanie sterowników przemysłowych, Wydawnictwa Naukowo-Techniczne

Result of average student's workload

| Activity | Time (working hours) |
|--|----------------------|
| 1. Lectures | 45 |
| 2. Laboratory exercises. | 30 |
| 3. Consultations and examination | 20 |
| 4. Preparation to laboratory exercises and elaboration of reports. | 30 |
| 5. Preparation to tests and examination. | 25 |

Student's workload

| Source of workload | hours | ECTS | | |
|----------------------|-------|------|--|--|
| Total workload | 150 | 6 | | |
| Contact hours | 80 | 3 | | |
| Practical activities | 75 | 3 | | |
