

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Mechanics and Mechatronics		Code 1010324371010324775
Field of study Electrical Engineering	Profile of study (general academic, practical) (brak)	Year /Semester 4 / 7
Elective path/specialty -	Subject offered in: Polish	Course (compulsory, elective) obligatory
Cycle of study: First-cycle studies	Form of study (full-time, part-time) part-time	
No. of hours Lecture: 10 Classes: - Laboratory: - Project/seminars: -		No. of credits 1
Status of the course in the study program (Basic, major, other) (brak)		(university-wide, from another field) (brak)
Education areas and fields of science and art technical sciences Technical sciences		ECTS distribution (number and %) 1 100% 1 100%
Responsible for subject / lecturer: dr inż. Dorota Stachowiak email: dorota.stachowiak@put.poznan.pl tel. 61 665 2396 Electrical Engineering ul. Piotrowo 3A 60-965 Poznań		Responsible for subject / lecturer: dr inż. Piotr Sujka email: piotr.sujka@put.poznan.pl tel. 61 665 2662 Electrical Engineering ul. Piotrowo 3A 60-965 Poznań
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	Elementary knowledge of electrical engineering, electronics, mechanics and automatics.
2	Skills	The ability to understand the phenomena of electromagnetic and mechanical
3	Social competencies	Consciousness the need to enhance knowledge and skills. Ability to comply with the rules applicable in the classroom lecture in a large group and the ability to communicate with the nearest environment and with lecturers
Assumptions and objectives of the course: The main goal is to obtain knowledge of the basics of mechatronics. Introduction to the design and principle of work of mechatronic devices.		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. Define the concepts of mechatronics, mechatronic system. Describe the role of sensor and actuator in the mechatronic system - [K_W12 ++]		
2. Know the application of MEMS. Explain the principle of the selected electrostatic transducer. - [K_W12 ++]		
Skills:		
1. Describe the essence of mechatronic systems. - [K_U11 + K_U16 +]		
2. Search of information from literature, databases, and other sources in field of mechatronics. - [K_U05 +++]		
Social competencies:		
1. Can deal with with selected mechatronic systems and demonstrate confidence in activities requiring knowledge of mechatronic devices. - [K_K02++ K_K06++]		
2. Is aware of the importance of the work of his own and a willingness to comply with the principles of teamwork and shared responsibility for the tasks performed. - [K_K03+++]		
Assessment methods of study outcomes		

<p>Lecture: -assessment of knowledge and skills by the completion of a written test, -continuous evaluation for each course (rewarding activity and quality of the expression).</p> <p>Extra points for the activity in the classroom, and in particular for: -discussion and proposition of additional aspects of the subjects, - comments related to the improvement of teaching materials, - quality and diligence of the developed reports</p>		
Course description		
<p>Definitions, purpose and scope of mechatronics. Mechatronic systems. Subsystems integration of mechanical, hydraulic, electrical and information technology in complex mechatronic systems. Sensors and actuators. Actuators electromagnetic, electrostatic, piezoelectric, pneumatic and hydraulic. Microelectromechanical systems (MEMS) microactuators, microsensors, the use of silicon technology. Electrostatic motors of linear and rotary motion.</p>		
Basic bibliography:		
Additional bibliography:		
Result of average student's workload		
Activity	Time (working hours)	
1. Lectures	15	
2. Participate in the consultations on the lecture	4	
3. Participate in the completing	10	
4. Prepare for the completion	2	
Student's workload		
Source of workload	hours	ECTS
Total workload	25	1
Contact hours	30	1
Practical activities	0	0
