		STUDY MODULE DE		F	
Name of the module/subject Measurements in electrical installations				Code 1010311361010315999	
Field of			Profile of study (general academic, practical)	Year /Semester	
Electrical Engineering			(brak)	3/6	
Elective path/specialty			Subject offered in:	Course (compulsory, elective	
0		on Devices and Electrical	Polish	obligatory	
Cycle 0	f study:		Form of study (full-time,part-time)		
	First-cy	cle studies	full-	time	
No. of h	nours			No. of credits	
Lectu	0.0000		r reject commarc.	15 3	
Status	of the course in the stud	y program (Basic, major, other) (brak)	(university-wide, from another f	(brak)	
Educati	on areas and fields of s	· · · /		ECTS distribution (number	
				and %)	
techi	nical sciences	•		3 100%	
	Technical sci	lences		3 100%

Design exercises:

Assessment:

- -of knowledge of the objectives and scope of measurements realization in electrical installation,
- -to develop test set-up, experiment planning and select measurement instrument,
- -to perform analyze of measurement and testing results.

Laboratory exercises:

Assessment of:

-experiment planning,

-experimental set-up and devices selection,

-experiment carry out and analyzing of results using modern methods and software,

-measurement accuracy analysis, physical and mathematical description and conclusions.

Getting extra points for the activity during seminar, and in particular for:

-teamwork developing set-up for testing electrical installation,

-teamwork implementation of the extended experiment,

-the use of modern methods to describe measurement results, mathematical and physical analysis and proposing the extended conclusions.

Course description

Principles of measurements in electrical installations. Methods and measurement instruments used in receiving and maintenance testing of electrical devices and installations. Testing of measures protection against electric shock in LV installations. Building Telecommunication Cabling testing: testing models (channel, basic link and permanent link), scope and testing parameters, uncertainty of results. Designing of set-up for investigation and testing electrical devices and installations.

4. PN-EN 50346 Technika informatyczna. Instalacja okablowania. Badanie zainstalowanego okablowania

Result of average student's workload

Activity	Time (working hours)
1. participation in the project activities	15
2. participation in the laboratory exercises	15
3. participation in the consulting on the project and laboratory exercises	4
4. preparation of test set-up, selection of devices and measurement instruments	12
5. preparation to the laboratory exercises	4
6. preparation of practical exercises report	10
7. preparation to the written test	16
8. participation in the test	0

Source of workload	hours	ECTS
Total workload	78	3
Contact hours	36	2
Practical activities	52	3
