

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Problems of power engineering security		Code 1010315431010315652
Field of study Power Engineering	Profile of study (general academic, practical) (brak)	Year /Semester 2 / 3
Elective path/specialty -	Subject offered in: Polish	Course (compulsory, elective) obligatory
Cycle of study: Second-cycle studies	Form of study (full-time, part-time) part-time	
No. of hours Lecture: 8 Classes: - Laboratory: - Project/seminars: 8		No. of credits 2
Status of the course in the study program (Basic, major, other) (brak)		(university-wide, from another field) (brak)
Education areas and fields of science and art		ECTS distribution (number and %)
Responsible for subject / lecturer: Radosław Szczerbowski email: radoslaw.szczerbowski@put.poznan.pl tel. 61 665 2030 Electric Engineering Piotrowo 3A, 60-965 Poznań		Responsible for subject / lecturer: Jerzy Andruszkiewicz email: jerzy.andruszkiewicz@put.poznan.pl tel. 61 665 2674 Electric Engineering Piotrowo 3A, 60-965 Poznań
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	Basic knowledge of electricity, power systems, energy management, fuels and their utilisation
2	Skills	Ability of effective self-education in the chosen field of study
3	Social competencies	Is aware of the need to expand his competences and aspires to improve the efficiency and safety of energy generation processes and energy transmission.
Assumptions and objectives of the course: Understanding the European Union's strategy for sustainable development of energy sector with special attention for the use of the environment, promotion of renewable energy and energy efficiency and the resulting actions taken in Poland. Knowledge about the measures undertaken to implement this strategy. Understanding the properties of power systems with special importance to their security, observed threats to this security and possible countermeasures.		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. He has the knowledge necessary to understand the issues of energy security, including the risks involved and about measures how to improve the level of security. - [K_W15+++] 2. Able to formulate and test hypotheses related to the analysis of the energy system states as well as the states of its components - [K_W10++]		
Skills:		
1. Able to assess the usefulness of the strategic objectives for the decision support in energy processes - [K_U09++] 2. Able to formulate and test hypotheses related to the analysis of the energy system states as well as the states of its components - [K_U10++]		
Social competencies:		
1. He can think and act in a creative and entrepreneurial way, understands the need for the formulation and communication of information and opinions on the performance of energy industries to the public - [K_K01+] 2. Correctly identifies and resolves dilemmas related to the country energy security - [K_K02+]		
Assessment methods of study outcomes		

<p>Lectures: - evaluation of the knowledge and skills demonstrated in written test concerning issues presented, - evaluation of the activity and quality of perception.</p> <p>Classes: - results of test favoring the utilization of the acquired knowledge to solve problems in the area of the subject.</p>		
Course description		
<p>Fuel resources and modern energy generation and transmission technologies. The costs of generating electricity and heat, taking into account the impact on the environment (CO₂, SO₂). EU sustainable energy policy to reduce emissions, promote renewable energy and energy efficiency. Diversification of energy sources including different generation technologies. Risks for security of energy supply characteristic for different energy sources and the methods for the evaluation and limitation of their values. Methods for granting the local security of energy supply by stand by power resources. Subject of classroom exercises consistent with the lectures.</p>

G.Bartodziej, M.Tomaszewski, Polityka energetyczna i bezpieczeństwo energetyczne, Wydawnictwo Federacji Stowarzyszeń Naukowo-Technicznych.Energetyka i Środowisko, Warszawa, 2009</p> <p>2. M. Kaczmarek, Bezpieczeństwo energetyczne Unii Europejskiej. Wydawnictwo Akademickie i Profesjonalne. 2010.</p> <p>3. T.Sutkowski. Rezerwowe i bezprzerwowe zasilanie w energię elektryczną; urządzenia i układy. ESP COSiW, 2007</p>		
<p>Additional bibliography:</p> <p>1. Praca zbiorowa.Safety of the Polish Power System.Defence and Restoration Plans, Electrical Engineering Issue 57, Published by Poznan University of Technology, Poznań, 2008</p> <p>2. B. Poskrobko. Zrównoważony rozwój gospodarki opartej na wiedzy, Wydawnictwo Wyższej Szkoły Ekonomicznej w Białymstoku, Białystok 2009</p> <p>3. D.Laudyn, M.Pawlik, F.Strzelczyk. Elektrownie, WNT W-wa 2000</p>		
Result of average student's workload		
Activity	Time (working hours)	
1. Participation in courses and classrooms	16	
2. Preparation for examination	20	
3. Consultations concerning lectures and classrooms	2	
Student's workload		
Source of workload	hours	ECTS
Total workload	38	2
Contact hours	18	1
Practical activities	0	0
