

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Mathematics		Code 1010314411010340025
Field of study Power Engineering	Profile of study (general academic, practical) (brak)	Year /Semester 1 / 1
Elective path/specialty -	Subject offered in: Polish	Course (compulsory, elective) obligatory
Cycle of study: First-cycle studies	Form of study (full-time, part-time) part-time	
No. of hours Lecture: 30 Classes: 30 Laboratory: - Project/seminars: -		No. of credits 5
Status of the course in the study program (Basic, major, other) (brak)		(university-wide, from another field) (brak)
Education areas and fields of science and art technical sciences Technical sciences		ECTS distribution (number and %) 5 100% 5 100%
Responsible for subject / lecturer: dr Jacek Gruszka email: jacek.gruszka@put.poznan.pl tel. 61 665 2320 Wydział Elektryczny ul. Piotrowo 3A 60-965 Poznań		
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	Knowledge of mathematics of the secondary school
2	Skills	Ability to solve problems and mathematical modeling at the level of secondary school
3	Social competencies	Awareness of the need to broaden their competence, willingness to work together as a team
Assumptions and objectives of the course: 1. Learning algebraic structures and methods of linear algebra 2. Learning the methods and applications of differential and integral calculus of functions of one variable		
Study outcomes and reference to the educational results for a field of study		
Knowledge: 1. knows the rules of solving polynomials, exponentiation, and root in the set of complex numbers, - [K_W01+++] 2. know the concept of matrix, the method of elementary operations on matrices, rules of solving systems of linear equations and calculating the determinants - [K_W01+++] 3. knows the boundary term convergence of the series, the concept of derivative and calculation methods, the use of derivatives to C - [K_W01+++]		
Skills: 1. solve the equation of the second degree with complex coefficients, determine the trigonometric form of a complex number - [K_U06++ K_U07+++] 2. Perform addition and multiplication of matrices, calculate the inverse matrix, solve the system of linear equations, compute determinant - [K_U06++ K_U07+++] 3. calculate the derivative of a function of one variable, to examine the monotonicity intervals, calculate the extremes, expand the function in a Taylor and Maclaurin series - [K_U06++ K_U07+++] 4. calculate the indefinite integral, calculate the definite integral, determine field area, the length of the curve - [K_U06++ K_U07+++]		
Social competencies: 1. able to think and act strictly in the area of process description in technical sciences - [K_K07 ++]		

Assessment methods of study outcomes		
<p>Lecture</p> <p>? assess the knowledge and skills listed on the written exam of a problematic</p> <p>Classes:</p> <p>? knowledge test and rewarding than that for the accomplishment undue problems - solving</p> <p>? continuous evaluation for each course - short tests</p> <p>? assessment of knowledge and skills - tests.</p>		
Course description		
<p>Complex numbers - Gaussian form, trigonometric, Euler, exponentiation and roots, polynomials, roots of unity. Cash matrix - operations with matrices, inverse matrix, determinant of a square matrix, systems of linear equations and inequalities, the method of Gauss. Analytical Geometry in the plane-vectors, simple curves.</p> <p>Sequences - limitations, monotonicity, the limits of sequences, the number of e. Series of numbers - the concept of an infinite series, the sum of a number of criteria for convergence, power series. The concept features a complex function, the inverse function, limit and continuity of functions. Differential calculus of functions of one variable: the derivative of a function differentiable functions extremes, the second derivative - convexity, concavity, inflection points, higher order derivatives, Taylor's formula, differential, rule of de L'Hospital. Integral calculus of functions of one variable indefinite integral - basic methods of integration. Definite integral, Riemann integral and its applications.</p>
