| Prere  | quisites in term  | s of knowledge, skills an   | d social competencies:               |  |  |
| 1  | Knowledge   | Basic mathematical knowledge of mathematical logic, algebra and mathematical analysis.  |                                      |  |  |
| 2  | Skills  | Ability to applications of basic combinatorial concepts.  |                                      |  |  |
| 3  | Social competencies   | Understanding necessity of broadening ones competences, readiness to working and cooperating in team and taking responsibility for jointly realized task. |                                      |  |  |
| Assu   | mptions and obj   | ectives of the course:  |                                      |  |  |
|  | rpose of the course is oplications in compute   | to introduce students to basic dis r science.   | crete mathematics concepts and       | d methods and possibilities of           |  |
|  | Study outco   | mes and reference to the  | educational results for              | a field of study                         |  |

# Knowledge:

- 1. Student knows and understands basic theorems and methods in discrete mathematics. [K\_W01, K\_W04]
- 2. Student knows basic types of practical issues using chosen combinatorial models. [K\_W04, K\_W06]

#### Skills:

- 1. Student can individually conduct exact reasoning using the achieved knowledge.  $\,$  [K\_U02]
- 2. Student can construct recurrence equation describing a certain problem and solve it. [K\_U06]

## Social competencies:

- 1. Student appreciates the need and necessity of exact reasoning and continuous development. [K\_K01]
- 2. Student is able search out some information in literature by oneself. [K\_K01]

| Assessment methods of study outcomes   |  |  |  |  |  |
|--|--|--|--|--|--|
| Lecture: written exam.   |  |  |  |  |  |
| Classes: evaluation of two written tests and the direct activity during the classes. |  |  |  |  |  |
| Course description   |  |  |  |  |  |

### **Faculty of Electrical Engineering**

Elements of mathematical logic and methods of proving theorems: propositional calculus, tautologies, direct proof, proof by reductio ad absurdum, the principle of mathematical induction. Principles of counting, permutations and combinations, binomial coefficients, principle of inclusion exclusion.

Recursive dependencies. Fibonacci numbers. Linear recurrence equations with constant coefficients.

The algorithm of Euclid for the calculation of the greatest common divisor, the congruence calculus module a positive integer, Chinese reminder theorem, Fermat's Theorem and Euler's Theorem, the RSA crypto.

### Result of average student's workload

| Activity                        | Time (working hours) |
|---------------------------------|----------------------|
| 1. Lectures                     | 20                   |
| 2. Classes                      | 20                   |
| 3. Final exam and consultations | 7                    |
| 4. Preparing for classes        | 43                   |
| 5. Preparing for tests          | 30                   |
| 6. Preparing for the final exam | 20                   |

#### Student's workload

| Source of workload   | hours | ECTS |
|----------------------|-------|------|
| Total workload       | 140   | 6    |
| Contact hours        | 47    | 3    |
| Practical activities | 93    | 3    |
