

| <b>STUDY MODULE DESCRIPTION FORM</b>   |   |  |
|--|---|--|
| Name of the module/subject<br><b>Languages and paradigms of programming</b>  |   | Code<br><b>1010334541010334960</b>   |
| Field of study<br><b>Information Engineering</b>   | Profile of study (general academic, practical)<br><b>(brak)</b> | Year /Semester<br><b>2 / 4</b>   |
| Elective path/specialty<br><b>-</b>  | Subject offered in:<br><b>Polish</b>                            | Course (compulsory, elective)<br><b>obligatory</b>   |
| Cycle of study:<br><b>First-cycle studies</b>  | Form of study (full-time, part-time)<br><b>part-time</b>        |  |
| No. of hours<br>Lecture: <b>20</b> Classes: <b>-</b> Laboratory: <b>20</b> Project/seminars: <b>-</b>  |   | No. of credits<br><b>4</b>   |
| Status of the course in the study program (Basic, major, other)<br><b>(brak)</b>   |   | (university-wide, from another field)<br><b>(brak)</b>   |
| Education areas and fields of science and art  |   | ECTS distribution (number and %)   |
| <b>Responsible for subject / lecturer:</b>   |   |  |
| dr inż. Grażyna Brzykcy<br>email: grazyna.brzykcy@put.poznan.pl<br>tel. 616653724<br>Wydział Elektryczny<br>ul. Piotrowo 3A 60-965 Poznań  |   |  |
| <b>Prerequisites in terms of knowledge, skills and social competencies:</b>  |   |  |
| 1  | <b>Knowledge</b>  | Student has basic knowledge of mathematics, especially in such fields as algebra, analysis and logic, basic knowledge of program constructs, implementation of algorithms, formal languages and programming platforms. |
| 2  | <b>Skills</b>   | Student is able to use basic techniques to create algorithms, to analyze their complexity, and to use software platforms and environments for simple programs encoding, running and testing.                           |
| 3  | <b>Social competencies</b>                                      | Student understands the importance of stringent accomplishment of a given project with proper notation standards.  |
| <b>Assumptions and objectives of the course:</b>   |   |  |
| Presentation of declarative programming styles and rules of choosing the adequate style and language to a class of problems.<br>Development of declarative programming skills in functional and logic programming environments.  |   |  |
| <b>Study outcomes and reference to the educational results for a field of study</b>  |   |  |
| <b>Knowledge:</b>  |   |  |
| 1. Student has organized and theoretically founded knowledge of creation, implementation and applicability of recursive data structures. - [[K_W04]]<br>2. Student has organized and theoretically founded knowledge of computation models and basic declarative program constructions. - [[K_W05]]<br>3. Student is familiarized with state of the art and current trends in programming paradigms. - [[K_W19]] |   |  |
| <b>Skills:</b>   |   |  |
| 1. Student is able to create engineer work documentation and declaratively present the work result. - [[K_U03]]<br>2. Student can use techniques of logic and functional programming to create algorithms. - [[K_U09]]<br>3. Student is able to use declarative software platforms and environments for simple programs encoding, running and testing. - [[K_U10]]   |   |  |
| <b>Social competencies:</b>  |   |  |
| 1. Student understands and is aware of the importance of issues related to computer engineer activity. Student understands the responsibility for his engineering decisions. - [[K_K02]]<br>2. Student understands the importance of stringent accomplishment of a given project with proper notation standards, proper language. Student understands the importance of keeping deadlines. - [[K_K07]]           |   |  |
| <b>Assessment methods of study outcomes</b>  |   |  |

|  |                             |             |
|--|-----------------------------|-------------|
| <p>Lecture<br/>                 Written test based on lecture (basic concepts and techniques used in declarative programming).<br/>                 Laboratory<br/>                 Students' marks are based on continuous assessment of their programming activity and results of two written tests (creation of simple programs).</p>   |                             |             |
| <b>Course description</b>  |                             |             |
| <p>Lectures<br/>                 Logic as programming language (procedural aspect of SLD-resolution). Data structures and procedures in Prolog. Functional programming: data types, functions, overview of languages and environments. Current trends in declarative programming. Some non-classical programming techniques: evolutionary computation, constraint-based programming, rule systems.<br/>                 Laboratory<br/>                 Creation of algorithms and their implementation in declarative programming languages: logic programming language Prolog, and functional programming language Scheme.</p> |                             |             |
| <b>Basic bibliography:</b>   |                             |             |
