

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Materials Science		Code 1011104211011003076
Field of study Safety Engineering - Part-time studies - First-	Profile of study (general academic, practical) (brak)	Year /Semester 1 / 1
Elective path/specialty -	Subject offered in: Polish	Course (compulsory, elective) obligatory
Cycle of study: First-cycle studies	Form of study (full-time, part-time) part-time	
No. of hours Lecture: 10 Classes: - Laboratory: 8 Project/seminars: -		No. of credits 3
Status of the course in the study program (Basic, major, other) (brak)		(university-wide, from another field) (brak)
Education areas and fields of science and art		ECTS distribution (number and %)
Responsible for subject / lecturer: dr hab. inż. Andrzej Młynarczak, prof. nadzw. email: andrzej.mlynarczak@put.poznan.pl tel. 061 665 35 75 Faculty of Mechanical Engineering and Management ul. Piotrowo 3, 60-965 Poznań		
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	Student has a basic knowledge of chemistry, physics and mathematics.
2	Skills	Student has a basic knowledge of chemistry, physics and mathematics. Student can think logically, associates the image with the description.
3	Social competencies	Student understands the need to learn and acquisition knowledge, systematic learning.
Assumptions and objectives of the course: Understanding the relationship between chemical composition, physical properties and material microstructure in combination with heat treatment, thermo-chemical treatment and plastic forming.		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. Student knows the basic engineering materials groups. - [K_W03, K_W16]		
2. Student knows the basic mechanical, physical and chemical properties of material. - [K_W08, K_W11, K_W14]		
Skills:		
1. Student can evaluate the structure and properties of materials on the basis of phase equilibrium diagrams. - [K_U01, K_U03, K_U05, K_U13]		
2. Student can propose appropriate heat treatment of ferrous alloys. - [K_U01, K_U05]		
Social competencies:		
1. Student is aware of the importance of materials properties in economy. - [K_K02]		
2. Students can cooperate in a group. - [K_K03]		
Assessment methods of study outcomes		

<p>Formative assessment:</p> <p>a. In the range of laboratory, on the basis of oral responses with each exercise.</p> <p>b. In the range of lectures, on the basis of two tests during the semester.</p> <p>Collective assessment:</p> <p>a. In the range of laboratory, average of grades obtained in the exercise.</p> <p>b. In the range of lectures - oral exam.</p>		
Course description		
<p>Lecture:</p> <p>Classification, types of materials and their use. Important properties of materials. Factors influencing the properties of materials. Methods and techniques of materials properties modification. Classification of metals and alloys. Phase equilibrium diagrams of metal alloys. Types, microstructure and properties of phases in metal alloys. Iron alloy - microstructure, properties and their modifications, destiny. Copper alloys. Aluminum alloys. Titanium alloys. Ceramics - types, microstructure, properties and uses. Plastics - types, microstructure, properties and uses. Composites - types of structure and properties. Heat treatment and thermo-chemical treatment. Importance, types and properties of the surface layers.</p> <p>Laboratory:</p> <ol style="list-style-type: none"> 1. Structural steels 2. Structure and properties of steel after heat treatment 3. Tool steels 4. Cast iron and cast steel 5. Copper and copper alloys 6. Aluminum alloys 7. Surface layers 8. Engineering ceramics 9. Composites 		
Basic bibliography:		
Additional bibliography:		
Result of average student's workload		
Activity	Time (working hours)	
1. Participation in lectures	10	
2. Participation in laboratory excercises	8	
3. Preparation for laboratory excercises	10	
4. Preparation for the exam	25	
5. Conducting the exam	2	
6. Discussion of exam results	2	
7. Elaboration of laboratory reports	7	
Student's workload		
Source of workload	hours	ECTS
Total workload	67	3
Contact hours	22	1
Practical activities	8	1
