Prere	equisites in term	s of knowledge, skills and	social competencies:			
1	Knowledge	Student has a basic knowledge of	knowledge of management and economics.			
2	Skills	Student is able to properly analyz phenomena as well as interpret the	ze the causes, management processes and economic the results of these observations.			
	a	Student is able to handle basic computer programs.				
3	Social	Student is able to determine prior		fied by himself or others tasks.		
<u> </u>	competencies	tencies Student is able to interact in a group. and objectives of the course:

1. Student understands the need and knows means how to self-study (first, second and third cycle studies, postgraduate studies, qualification courses)- improving professional, personal and social competence; can argument the need to learn for the whole life. - [K2A_K1]

2. Student is fully aware of the responsibility that he has taken for his own work and expresses readiness to comply with the rules of team work as well as responsibility for mutually realized and completed tasks. - [K2A_K3]

3. Student can determine some causal relationships in the process of targets implementation and rank pertinence of alternative or competitive tasks. - [K2A_K4]

Assessment methods of study outcomes

Formative assessment:

a) laboratories: on the basis of the scored assessment in the simulation game

b) lectures: on the basis of a written or oral answers to questions regarding the material covered during the current and previous lectures,

Collective assessment:

a) laboratories: on the basis of grade average

b) lectures: written assignment on the basis of the lectures content

Course description

- Lectures: Management processes and leading teams of people. The main roles and management skills of managers. The essence of leadership in teams and organizations. Behaviour of leaders. Classical and situational theories leading teams. Processes of motivating people to work. Managing the process of improvement of organizational units. Managing group and interpersonal processes in organizational units. Communication processes in organizations. Management decision making; models of the decision-making processes.

- Laboratory: Three stepped simulation computer game; a case study in targeting the fictional business organization. Following steps include the necessity to tackle new tasks of increasing difficulty, but embedded in the same critical business reality. The game includes four sessions, each of the members of the quadruple group plays a role of the director (leader).
