STUDY MODULE DESCRIPTION FORM

Name of the module/subject **Mathematical Decision Making**		Code **1011102211011006436**
Field of study **Safety Engineering - Full-time studies - Second-**	Profile of study (general academic, practical) **(brak)**	Year /Semester **1 / 1**
Elective path/specialty **Work Safety Management**	Subject offered in: **Polish**	Course (compulsory, elective) **obligatory**
Cycle of study: **Second-cycle studies**	Form of study (full-time,part-time) **full-time**	

No. of hours				No. of credits **4**
Lecture: **15**	Classes: **30**	Laboratory: **-**	Project/seminars: **-**	

Status of the course in the study program (Basic, major, other) **(brak)**	(university-wide, from another field) **(brak)**

Education areas and fields of science and art	ECTS distribution (number and %**)**

Responsible for subject / lecturer:

dr Piotr Rejmenciak
email: piotr.rejmenciak@put.poznan.pl
tel. +48 61 665 2812
Faculty of Electrical Engineering
ul. Piotrowo 3A, 60-965 Poznań

Prerequisites in terms of knowledge, skills and social competencies:

1	**Knowledge**	Students have knowledge of mathematics, particularly calculus and algebra.
2	**Skills**	Students can determine the extremes of functions of one variable, compute the partial derivatives, operate on matrices. Students can check the basic properties of the relationship.
3	**Social competencies**	Students are eager to learn.

Assumptions and objectives of the course:

The aim of the course is to familiarize students with the different methods that help in making the best decisions.

Study outcomes and reference to the educational results for a field of study

Knowledge:

1. Students know and understand methods to make optimal decisions. - [K2A-W01, K2A-W04]

2. Students know a mathematical model and the optimization criterion for the real issues. - [K2A-W01, K2A-W04]

Skills:

1. Students are able to formulate a mathematical model of linear and nonlinear programming problems. - [K2A-U1-5, K2A-U10, K2A-U12, K2A-U18]

2. Students can discuss the real issues of the optimal solution for any changes in the input data. - [K2A-U1-5, K2A-U10, K2A-U12, K2A-U18]

3. Students can analyze the decision problem in terms of expectations for the results obtained and the amount of work needed to receive. - [K2A-U1-5, K2A-U10, K2A-U12, K2A-U18]

Social competencies:

1. Students understand the need and knows the possibilities of lifelong learning. - [K2A-K1, K2A-K3]

2. Students see the opportunity to use the learned knowledge into practice. - [K2A-K1, K2A-K3]

Assessment methods of study outcomes

Formative assessment:
a) In regards to classes: on the basis of two written tests.
b) Regarding lectures: on the basis of oral or written assignments relating to the material covered during current or previous lectures.
Collective assessment:
a) In respect to classes:receive 51% of the total points is equivalent to completing the exercise, the assessment "change" every 10 percentage points.
b) Considering lectures: the average of formative marks.

Course description

?	Mathematic programming
?	Network algorithms: determination of the shortest path in the graph, determination of the maximum flow in the transport network
?	Transport Problems
?	Games
?	Rough set theory;
?	Relations: orders
?	Fuzzy set theory

Basic bibliography:

Additional bibliography:

Result of average student's workload

Activity	Time (working hours)
1. Participation in lectures	15
2. Participation in exercises	30
3. Consultation	5
4. Preparing for training	15
5. Preparing for colloquia	20

Student's workload

Source of workload	hours	ECTS
Total workload	85	4
Contact hours	50	2
Practical activities	50	2
