STUDY MODULE DESCRIPTION FORM

Name of the module/subject **Operational Research and Econometrics**	Code **1011105311011134996**

Field of study **Engineering Management - Part-time studies -**	Profile of study (general academic, practical) **(brak)**	Year /Semester **1 / 1**

Elective path/specialty **Quality Systems and Ergonomics**	Subject offered in: **Polish**	Course (compulsory, elective) **obligatory**

Cycle of study: **Second-cycle studies**	Form of study (full-time,part-time) **part-time**

No. of hours				No. of credits **3**
Lecture: **16**	Classes: **14**	Laboratory: **-**	Project/seminars: **-**	

Status of the course in the study program (Basic, major, other) **(brak)**	(university-wide, from another field) **(brak)**

Education areas and fields of science and art **social sciences** **Economics**	ECTS distribution (number and %**)** **100 3%** **100 3%**

Responsible for subject / lecturer: dr Tomasz Brzęczek email: tomasz.brzeczek@put.poznan.pl tel. 61 665 33 92 Wydział Inżynierii Zarządzania ul. Strzelecka 11 60-965 Poznań	Responsible for subject / lecturer: dr Tomasz Brzęczek email: tomasz.brzeczek@put.poznan.pl tel. 61 665 33 92 Faculty of Engineering Management ul. Strzelecka 11 60-965 Poznań

Prerequisites in terms of knowledge, skills and social competencies:

1	**Knowledge**	Student knows economic terms and management problems, esppecially operation management problems.
2	**Skills**	Student has Excel and computer skills. Makes basic operations of matrix algebra.
3	**Social competencies**	Student works in team and prepares project.

Assumptions and objectives of the course:

To develop skills of input-output modeling in management systems and optimization skills. To deliver knowledge about methods of management optimization and methods of estimation of an economic model.

Study outcomes and reference to the educational results for a field of study

Knowledge:

1. Student knows typical optimization problems in management, their objectives and constraints. - [K2A_W01]

2. Knows problems of production structure, mixture and schedulling. - [K2A_W09]

3. Knows allocation problems for tasks, resources, travel route and for transport plan problem. - [K2A_W09]

4. Knows optimization methods with continous and descrete variable and linear or non-linear function. - [K2A_W09]

5. Knows multi criteria optimization methods. - [K2A_W09]

6. Knows ordinary least squares method. - [K2A_W10]

Skills:

1. Student builds input-output model of economic system effectiveness. - [K2A_U01]

2. Uses optimization methods: graphical, simplex, graphs and transportation algorithm. - [K2A_U04,]

3. Student estimates or optimizes models with Excel, GRETL and Solver (inc. Solver Foundation). - [K2A_U07]

4. Uses multi criteria methods (aims hierarchy, metacriterion, fulfillment degre, AHP). - [K2A_U04]

5. Estimates linear and linaerizable econometric models with OLS. - [K2A_U04]

6. Explains results of optimization and econometric models and uses them in management. - [K2A_U02]

Social competencies:

1. Student is aware of optimization benefits in management and planning. - [K2A_K03]

2. Spreads optimization in management problem solving. - [K2A_K05]

3. Can objectively assess and analyze data and solutions of management problems. - [S2A_K06]

Assessment methods of study outcomes

Exercises pass with mark from written test in theory and tasks.

Course description

1. Estimation of linear and linearizable econometric models with OLS.

2. Clasification and modeling of decision tasks. Problems of production structure, mixture, resource division, transportation and tasks allocation.

3. Linear programming. Simplex and graphical method.

4. Multi-criteria continous programming. Metacriterion, objectives hierarchy.

5. Multi-criteria integer programming. Fulfillment degre, AHP.

6. Net programming. CPM ? critical path method. PERT-program evaluation and review technique.

7. Transportat optimization problem and Little algorithm.

8. Basics of nonlinear programming.
