| Prerequisites in terms of knowledge, skills and social competencies:  |  |  |   |   |  |  |  |
| 1   | Knowledge  | Student knows economic terms and management problems, esppecially operation management problems. |   |   |  |  |  |
| 2   | Skills   | Student has Excel and computer skills. Makes basic operations of matrix algebra.                 |   |   |  |  |  |
| 3   | Social competencies  | Student works in team and prepares project.  |   |   |  |  |  |
| Assu  | mptions and obj  | ectives of the course:   |   |   |  |  |  |
| To dev  | elop skills of input-out   | put modeling in management syst timization and methods of estimati                               |   | deliver knowledge about                         |  |  |  |
|   |  | mes and reference to the   |   | a field of study                                |  |  |  |
| Knov  | vledge:  |  |   | <u> </u>  |  |  |  |
|   |  | mization problems in managemen   | t. their objectives and constrain                   | ts [K2A W01]                                    |  |  |  |
| Student knows typical optimization problems in management, their objectives and constraints [K2A_W01]     Knows problems of production structure, mixture and schedulling [K2A_W09] |  |  |   |   |  |  |  |
| 3. Knows allocation problems for tasks, resources, travel route and for transport plan problem [K2A_W09]  |  |  |   |   |  |  |  |
| 4. Knows optimization methods with continous and descrete variable and linear or non-linear function [K2A_W09]  |  |  |   |   |  |  |  |
| 5. Knows multi criteria optimization methods [K2A_W09]  |  |  |   |   |  |  |  |
| 6. Knows ordinary least squares method [K2A_W10]  |  |  |   |   |  |  |  |
| Skills:   |  |  |   |   |  |  |  |
| Student builds input-output model of economic system effectiveness [K2A_U01]  |  |  |   |   |  |  |  |
| 2. Uses optimization methods: graphical, simplex, graphs and transportation algorithm [K2A_U04,]  |  |  |   |   |  |  |  |
|   |  | nizes models with Excel, GRETL a   |   |   |  |  |  |
| 4. Use  | s multi criteria method  | s (aims hierarchy, metacriterion, f  | fulfillment degre, AHP) [K2A_                       | _U04]   |  |  |  |
| 5. Esti   | 5. Estimates linear and linaerizable econometric models with OLS [K2A_U04] |  |   |   |  |  |  |

6. Explains results of optimization and econometric models and uses them in management. - [K2A\_U02]

# **Faculty of Engineering Management**

- 1. Student is aware of optimization benefits in management and planning. [K2A\_K03]
- 2. Spreads optimization in management problem solving. [K2A\_K05]
- 3. Can objectively assess and analyze data and solutions of management problems. [S2A\_K06]

### Assessment methods of study outcomes

Exercises pass with mark from written test in theory and tasks.

### **Course description**

- 1. Estimation of linear and linearizable econometric models with OLS.
- 2. Clasification and modeling of decision tasks. Problems of production structure, mixture, resource division, transportation and tasks allocation.
- 3. Linear programming. Simplex and graphical method.
- 4. Multi-criteria continous programming. Metacriterion, objectives hierarchy.
- 5. Multi-criteria integer programming. Fulfillment degre, AHP.
- 6. Net programming. CPM? critical path method. PERT-program evaluation and review technique.
- 7. Transportat optimization problem and Little algorithm.
- 8. Basics of nonlinear programming.

### Result of average student's workload

| Activity        | Time (working hours) |
|-----------------|----------------------|
| 1. Lectures     | 16                   |
| 2. Exercises    | 14                   |
| 3. Consultation | 30                   |
| 4. Student      | 30                   |

## Student's workload

| Source of workload   | hours | ECTS |
|----------------------|-------|------|
| Total workload       | 90    | 3    |
| Contact hours        | 60    | 2    |
| Practical activities | 30    | 1    |
