

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Flexible Manufacturing Systems		Code 1011105311011110225
Field of study Engineering Management - Part-time studies -	Profile of study (general academic, practical) (brak)	Year /Semester 1 / 1
Elective path/specialty Production and Operations Management	Subject offered in: Polish	Course (compulsory, elective) elective
Cycle of study: Second-cycle studies	Form of study (full-time, part-time) part-time	
No. of hours Lecture: 10 Classes: - Laboratory: - Project/seminars: -		No. of credits 3
Status of the course in the study program (Basic, major, other) (brak)		(university-wide, from another field) (brak)
Education areas and fields of science and art technical sciences		ECTS distribution (number and %) 3 100%
Responsible for subject / lecturer: dr inż. Ireneusz Gania email: ireneusz.gania@put.poznan.pl tel. 616653385 Faculty of Engineering Management ul. Strzelecka 11 60-965 Poznań		Responsible for subject / lecturer: dr inż. Ireneusz Gania email: ireneusz.gania@put.poznan.pl tel. 616653385 Faculty of Engineering Management ul. Strzelecka 11 60-965 Poznań
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	Student knows the basic concepts related to construction, design, implementation, operation of flexible manufacturing systems in the engineering industry companies.
2	Skills	Student has the ability to perceive, association, interpretation of the phenomena occurring in the sphere of production and organization of both conventional.
3	Social competencies	Student understands and is prepared to take on social responsibility for decisions related to the design and implementation
Assumptions and objectives of the course: -Acquaint students with the nature, scope and methods of design and implementation of flexible manufacturing systems.		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. He knows the general principles of organizational development in the area of flexible manufacturing systems - [[K2A_W03]]		
2. He has deepened knowledge of organizational relationships especially in the area of functional subsystems of flexible manufacturing systems - [[K2A_W05]]		
3. He knows the methods and tools for modeling decision making processes in the area of production systems - [[K2A_W09]]		
4. He has deepened knowledge of the mechanisms of formation and alteration of production structures - [[K2A_W14, K2A_W15]]		
Skills:		
1. He can make proper use of theoretical knowledge to analyze and evaluate the flexible manufacturing system - [[K2A_U02, K2A_U06]]		
2. Knowledgeable of how independently propose specific solutions to the problem of the management and implementation procedures for taking decisions in this area - [[K2A_U07]]		
3. Knowledgeable of how use their knowledge in various areas and forms, enhanced by a critical analysis of the effectiveness and suitability of applied knowledge - [[K2A_U03]]		
4. He uses efficiently the standards, rules and criteria to create the flexible manufacturing system in the enterprise - [[K2A_U05]]		
Social competencies:		

1. He has sense of responsibility for their own work and the willingness to work in accordance with the principles of teamwork and responsibility for performed jointly tasks - [[K2A_K02]]
2. He can notice depending on cause and effect in achieving the set goals and give rank of significance of alternative or competing tasks - [[K2A_K03]]
3. He is aware interdisciplinary knowledge and skills in the field of flexible manufacturing system - [[K2A_K06]]

Assessment methods of study outcomes		
-Score executed project. Written test of the scope of the content of the lecture		
Course description		
-Flexibility The concept and development of flexibility Flexible automation of production Construction of flexible manufacturing systems Functional subsystems ESP Machines with ESP Position control with ESP Auxiliaries Designing flexible manufacturing systems Design methods ESP Designing functional subsystems ESP Rating flexible manufacturing systems? Assessment methods ESP Evaluation of the effects of irrational ESP The development of flexible manufacturing systems Development of ESP in Poland Development of ESP in the world

Result of average student's workload		
Activity	Time (working hours)	
1. Participation in class lecture	10	
2. Consultation	15	
3. Own work	50	
Student's workload		
Source of workload	hours	ECTS
Total workload	75	3
Contact hours	25	2
Practical activities	50	1
