

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Supply chain management		Code 1011105331011112836
Field of study Engineering Management - Part-time studies -	Profile of study (general academic, practical) (brak)	Year /Semester 2 / 3
Elective path/specialty Enterprise Management	Subject offered in: Polish	Course (compulsory, elective) elective
Cycle of study: Second-cycle studies	Form of study (full-time,part-time) part-time	
No. of hours Lecture: 14 Classes: 10 Laboratory: - Project/seminars: -		No. of credits 3
Status of the course in the study program (Basic, major, other) (brak)		(university-wide, from another field) (brak)
Education areas and fields of science and art		ECTS distribution (number and %)
Responsible for subject / lecturer: dr inż. Katarzyna Grzybowska email: katarzyna.grzybowska@put.poznan.pl tel. 61 665 33 96 Faculty of Engineering Management ul. Strzelecka 11 60-965 Poznań		Responsible for subject / lecturer: dr inż. Katarzyna Grzybowska email: katarzyna.grzybowska@put.poznan.pl tel. 61 665 33 96 Faculty of Engineering Management ul. Strzelecka 11 60-965 Poznań
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	has a basic knowledge of management and organizational processes, including logistics processes,
2	Skills	able to identify the stages of material flow in the enterprise
3	Social competencies	there is no indication
Assumptions and objectives of the course: -introduce students with the problems of supply chain management,		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. Student is able to define the distribution problems as the essential elements of the logistics process - [[K1A_W14]] 2. Student is able to using a spreadsheet to design simple algorithms necessary for the distribution - [[K1A_W15]] 3. A student is able to explain in detail the concepts and phenomena characteristic of logistics and its specific issues (inventory management, logistics, distribution logistics and supply, logistics, ecologistics) as well as supply chain management - [[K1A_W17]] 4. The student knows how to formulate basic dependencies that are applicable within the framework of logistics and its specific issues (inventory management, logistics, distribution logistics and supply, logistics, ecologistics) as well as supply chain management - [[K1A_W18]] 5. has basic knowledge of products, equipment, technical systems - [[K1A_W19]] 6. knows elementary notions connected with reliability and security in maintaining technical equipment, objects and technical systems - [[K1A_W20]]		
Skills:		

<p>1. The student can do the search that is based on disciplinary literature and other sources, and can in an orderly way, present information about the issue in the framework of logistics and its specific issues (inventory management, logistics, distribution logistics and supply, logistics, ecologistics) and supply chain management - [[K1A_K01]]</p> <p>2. The student is sensitive to non-technical aspects and effects of engineering activities, including its impact on the environment and connected with it, responsibility for decisions in respect of a part of the logistics and supply chain management - [[K1A_K02]]</p> <p>3. has self-study ability and comprehends it - [[K1A_U05]]</p> <p>4. can make use of analytic, simulation and experimental methods to formulate and solve engineering problems - [[K1A_U09]]</p> <p>5. can conduct a critical analysis of the ways in which technical solutions function and assess, by means of Security Engineering, the existing technical solutions, in particular machines, equipment, objects, systems, services and processes - [[K1A_U13]]</p>
<p>Social competencies:</p> <p>1. is aware of the relevance of the study and understands non-technical aspect as well as the consequences of engineering activity, including its impact on environment and taken responsibility of his decisions - [[K1A_K02]]</p> <p>2. Student is responsible for the identification and resolution of the dilemmas associated with inventory management - [[K1A_K05]]</p>

<p>Assessment methods of study outcomes</p>
<p>Formative assessment: current check of the acquired knowledge and skills learnt during lectures</p> <p>Collective assessment: a test based written exam within exam session</p>

<p>Course description</p>
<p>The definition of the supply chain. Principles of supply chain operations: Maintain inventory in supply chain; Strategies to manage volatile demand in supply chain (Supply Buffer Management/Inventory Buffers/Capacity Buffers; Cycle Time Reduction Strategies; Postponement Strategies; Collaborative Processes; forecast and plan); Collaborative planning, forecasting, and replenishment (CPFR - nine steps); Analysis of Inventory - across the entire network; Conventional and integrated supply chains: Lean & Agile supply chain; Vendor-managed inventory (VMI); VMI - expectations of all parties; Information management (supplier - customer) ; VMI - Review process; JiT II: Explore the impact of forecasting models on the supply chain; Analysis of Inventory - across the entire network; The logistics operator in the supply chain (3rd party logistics, 4th party logistics). Benchmarking in the supply chain: Reduce variation in the supply chain; Problem solving techniques in process (define the problem; gather information; identify alternative solutions; evaluate the options and select the best option; evaluate the action); Problem solving techniques (Brainstorming; Mind mapping; 5 Why's; Cause and effect analysis (Fish bone diagram); PDCA Cycle); Identify process improvement opportunities (value stream mapping);</p>

Sołtysik M., Świerczek A., (2009) Podstawy zarządzania łańcuchami dostaw, Wydawnictwo Akademii Ekonomicznej, Katowice</p> <p>3. Witkowski J., (2010), Zarządzanie łańcuchem dostaw. Koncepcje, procedury, doświadczenia, Polskie Wydawnictwo Ekonomiczne, Warszawa</p>

<p>Additional bibliography:</p> <p>1. Bozarth C., Handfield R.B., (2007), Wprowadzenie do zarządzania operacjami i łańcuchem dostaw, Helion ? One Press, Katowice</p> <p>2. Ciesielski M., Długosz J. (red.), (2010), Strategie łańcuchów dostaw, Polskie Wydawnictwo Ekonomiczne, Warszawa</p> <p>3. Fechner I., (2007), Zarządzanie łańcuchem dostaw, Wyższa Szkoła Logistyki, Poznań</p>
--

<p>Result of average student's workload</p>	
<p>Activity</p>	<p>Time (working hours)</p>
1. Lectures	15
2. Project	15
3. Prepare for Training	45
4. Consultations	15
5. Work to project	5
6. Preparing to pass	3
7. Exam	2

<p>Student's workload</p>

Source of workload	hours	ECTS
Total workload	100	4
Contact hours	30	1
Practical activities	70	3
