| Assu | mptions and obj | ectives of the course: | | | | |
| The aim of the course is to familiarize students with the most important information in the field of technical drawings including PN. Based on information from the machine drawing the student gets acquainted with electrical drawings, architectural - construction and other as well as develops the ability to read technical drawings. | | | | | | |

Assessment methods of study outcomes

Faculty of Engineering Management

Formative assessment:

Classes: on the basis of the of the progress of the project tasks from technical drawing

Lectures: on the basis of the answers to the questions regarding the covered material during previous lectures

Collective assessment:

Lecture: exam- multiple choice test

Classes: public presentation of the prepared drawing, conducting a discussion connected with the presentation as well as the quality form of the prepared materials

Course description

The course covers the following topics: types of drawings, sheet formats, standard elements of technical drawing, drawings and their location, views and sections, dimensioning, tolerance dimensions, the shape and position, designation of roughness and waviness, connections of machine parts, axles, shafts, bearings, clutches and brakes. Drawing and reading: schemas:: mechanical, hydraulic, pneumatic, thermal energy and vacuum techniques, elements of electrical, chemical and architectural? construction drawings. Drawings: charts and nomograms.

Result of average student's workload

| Activity | Time (working hours) |
|-----------------------------|----------------------|
| 1. lecture | 30 |
| 2. Classes | 15 |
| 3. consultation | 30 |
| 4. preparation for classes | 15 |
| 5. revision of the material | 15 |
| 6. preparation for an exam | 15 |
| 7. exam | 0 |

Student's workload

| Source of workload | hours | ECTS |
|----------------------|-------|------|
| Total workload | 120 | 4 |
| Contact hours | 90 | 3 |
| Practical activities | 45 | 1 |
