

STUDY MODULE DESCRIPTION FORM				
Name of the module/subject Railway safety and operation			Code 1010102121010121993	
Field of study Civil Engineering Second-cycle Studies		Profile of study (general academic, practical) (brak)	Year /Semester 1 / 2	
Elective path/specialty Railways		Subject offered in: Polish	Course (compulsory, elective) obligatory	
Cycle of study: Second-cycle studies		Form of study (full-time,part-time) full-time		
No. of hours Lecture: 30 Classes: 15 Laboratory: 15 Project/seminars: 15			No. of credits 5	
Status of the course in the study program (Basic, major, other) (university-wide, from another field) (brak) (brak)				
Education areas and fields of science and art technical sciences Technical sciences			ECTS distribution (number and %) 5 100% 5 100%	
Responsible for subject / lecturer: DSc Eng. Jeremi Rychlewski email: jeremi.rychlewski@put.poznan.pl tel. 61 647 5816 Faculty of Civil and Environmental Engineering ul. Piotrowo 5 60-965 Poznań			Responsible for subject / lecturer: MSc Eng. Bogdan Bresch email: brak@brak tel. 61 665 2407 Faculty of Civil and Environmental Engineering ul. Piotrowo 5 60-965 Poznań	
Prerequisites in terms of knowledge, skills and social competencies:				
1	Knowledge	K_W01. Has an advanced knowledge of sectors of mathematical and physical knowledge important for railway construction. K_W02, K_W14. Knows rules governing design and dimensioning of rail roads. K_W17. Knows and uses building code rules.		
2	Skills	K_U02. Has an ability to classify rail network elements. K_U03, K_U09. Has an ability to design railway superstructure and layout of turnouts. K_U05. Knows methods for building process optimisation.		
3	Social competencies	K_K02. Is responsible for solidity of results acquired from own or subordinate team's work. K_K03. Individually supplements and enlarges knowledge about modern processes in rail transport. K_K11. Behaves with regard to rules of ethics.		
Assumptions and objectives of the course: A basic goal of this subject is to teach 1) rules of train traffic control and management 2) rail traffic engineering, including competition problems in transport, and 3) about yard service for rail vehicles.				
Study outcomes and reference to the educational results for a field of study				
Knowledge:				
1. Has knowledge about sustainable transport, - [K_W13] 2. Knows rules of rail traffic management and control, - [K_W16] 3. Knows basics of rail traffic engineering and rules governing competition in transport. - [K_W09, K_W11, K_W16]				
Skills:				
1. Can describe rules for safe train control and design location and signals of rail lights and signs, - [K_U09, K_U12] 2. Can draw a railway timetable graph for trains operating at a given cadence, - [-] 3. Can research a technical problem connected to train traffic management and yard service for rail vehicles. - [K_U17]				
Social competencies:				
1. Is conscious about a need for sustainable transport, - [K_K04] 2. Can formulate opinions concerning traffic management, - [K_K08] 3. Takes care about own health and physical fitness by using modes of transport alternative to the car. - [K_K13]				

Assessment methods of study outcomes		
Lectures ? written colloquium at semester?s end, activity during lectures, participation in technical trips; Classes ? participation in discussions, activity during classes, for students with lesser activity ? oral colloquium; Laboratory ? accomplishment of traffic engineering projects; Project ? achievement of projects with the projects? defence.		
Course description		
Lectures: Rail (including tram) traffic management: rail signalling, European Train Control System, turnout setting, confirmation of trains path through a station?s head. Control of rail traffic. Rail vehicle?s check-ups. Elements of rail traffic engineering. Competition in transport. Classes: Rail (including tram)traffic management and control. Regulation of rail traffic. Rail vehicle management. Reaction in emergency cases. Competition in transport Laboratory: Capacity and freedom of flow. Tram traffic management. Traffic simulations. Project: Rail signals and signs on a medium station. Turnout setting, confirmation of trains path through a station?s head, train detection. Railroad crossings. Construction of a cadential timetable and calculation of operational parameters.

Result of average student's workload		
Activity		Time (working hours)
1. Student?s attendance to lectures, classes, projects and laboratories, excluding technical trips. 2. Technical trips. 3. Consulting. 4. Preparation to colloquium. 5. Preparation to laboratory. 6. Designing project outside classrooms 7. Writing descriptions. 8. Preparation for projects? defence.		75 10 10 10 10 10 10 10
Student's workload		
Source of workload		hours
Total workload		125
Contact hours		85
Practical activities		70
