

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Stability of earth		Code 1010102131010106033
Field of study Civil Engineering Second-cycle Studies	Profile of study (general academic, practical) (brak)	Year /Semester 2 / 3
Elective path/specialty Railways	Subject offered in: -	Course (compulsory, elective) obligatory
Cycle of study: Second-cycle studies	Form of study (full-time, part-time) full-time	
No. of hours Lecture: 15 Classes: - Laboratory: 15 Project/seminars: -		No. of credits 3
Status of the course in the study program (Basic, major, other) (brak)		(university-wide, from another field) (brak)
Education areas and fields of science and art		ECTS distribution (number and %)
Responsible for subject / lecturer: prof. dr hab. inż. Antoni Florkiewicz email: antoni.florkiewicz@put.poznan.pl tel. 61 665 2148 Wydział Budownictwa i Inżynierii Środowiska ul. Piotrowo 5 60-965 Poznań		
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	Basic physics and mathematics. Basic theoretical mechanics. Engineering geology. Soil mechanics I degree.
2	Skills	Basic mathematical calculations. Basic structural design. Stress analysis in different soil conditions. Settlement analysis of construction works.
3	Social competencies	The need to constantly update and supplement knowledge and skills.
Assumptions and objectives of the course: The course aims to familiarize students with modern foundation methods applied in civil and structural engineering. Students learn about specific application of different foundation and soil improvement techniques. Design of deep pile foundations is executed individually by students, in order to acquire practical skills.		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. Knowledge on soil-bearing capacity for direct and deep foundations - [-K W 01-03] 2. Knowledge on stress, compressibility, shear strength, lateral earth pressure in soil - [-K W 01-03] 3. Knowledge on special foundation techniques and methods - [-K W 01-03] 4. Knowledge on soil improvement techniques and methods - [-K W 01-03]		
Skills:		
1. Calculation of stresses and deformations in soil mass - [-K U 01, 03] 2. Calculation of bearing capacity of direct and deep foundations. - [-K U 01, 03] 3. Design of soil improvement. - [-K U 01, 03]		
Social competencies:		
1. Student understands the need of lifelong learning, is able to organize the learning process of others - [[K_K06, K_K03] 2. Student correctly identifies and resolves problems associated with his profession. - [K_K07] 3. Student is able to cooperate and work in teams and groups. - [[K_K01]		

Assessment methods of study outcomes		
<p>-Deep foundation exercise: design and calculations of a pile foundation. -Direct shear laboratory test Report. -Final evaluation of tutorials and lectures - test in week 14. Evaluation of the course: [%] (grade) 100- 91 A excellent 90- 75 B very good 74- 65 C good 64- 51 D sufficient < 50 E failed < 50 E niedostateczny</p>		
Course description		
<p>-1.Definition of geotechnics. Geotechnical engineering vs. soil mechanics. General information on the subject of geotechnical engineering. Presentation of the engineering application of geotechnics. 2.Fundamentals of soil mechanics. Basic soil properties. Shear strength of soils. Compression and consolidation. 3.Foundation engineering. Bearing capacity. Settlement analysis. 4.Direct/shallow and deep foundations. 5.Soil improvement techniques and design. 6.Case studies I.</p>		
Basic bibliography:		
<p>1. Witun Z.: Zarys geotechniki. WKŁ, Warszawa 2001r. 2. Gradkowski K.: Budowle i roboty ziemne. OWPW, Warszawa 2010r.</p>		
Additional bibliography:		
<p>1. Pisarczyk S.: Geoinżynieria. Metody modyfikacji podłoża gruntowego. OWPW, Warszawa 2005r. 2. Pisarczyk S.: Grunty nasypowe. Właściwości geotechniczne i metody ich badania. OWPW, Warszawa 2009r.</p>		
Result of average student's workload		
Activity	Time (working hours)	
1. Participation in lectures	15	
2. Participation in tutorials	15	
3. Individual work at home	15	
Student's workload		
Source of workload	hours	ECTS
Total workload	75	3
Contact hours	35	1
Practical activities	25	1
