# Assessment methods of study outcomes

## Faculty of Civil and Environmental Engineering

#### Student Work includes:

- \* The development and presentation of a selected topic in the subject
- \* Project to improve the system of quality management
- \* Written test

Rating scale (test):

more than 100 targeted

91-100 very good (A)

81 - 90 good plus (B)

71 - 80 Good (C)

61 - 70 is sufficient plus (D)

51 - 60 satisfactory (E)

insufficient under 50 (F)

### **Course description**

Introduction, rationale implementation of quality management systems. Development of quality engineering genesis of quality management systems, current status and prospects for development. Authorities in the field of quality management (Deming's ideas, Juran, Crosby on white and others) - the concept of quality engineering based on their assumptions. The essence of Total Quality Management (assumptions, the basic elements). System measures, methods and tools of quality management and teamwork. Mutual communication, motivation and organizational culture.
