

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Mathematics		Code 1010101121010340004
Field of study Civil Engineering First-cycle Studies	Profile of study (general academic, practical) (brak)	Year /Semester 1 / 2
Elective path/specialty -	Subject offered in: Polish	Course (compulsory, elective) obligatory
Cycle of study: First-cycle studies	Form of study (full-time, part-time) full-time	
No. of hours Lecture: 30 Classes: 15 Laboratory: - Project/seminars: -		No. of credits 5
Status of the course in the study program (Basic, major, other) (brak)		(university-wide, from another field) (brak)
Education areas and fields of science and art		ECTS distribution (number and %)
Responsible for subject / lecturer: dr Jarosław Mikołajski email: jaroslaw.mikolajski@put.poznan.pl tel. +48 61 665 2712 Faculty of Electrical Engineering ul. Piotrowo 3A 60-965 Poznań		
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	Mathematical knowledge from the first semester.
2	Skills	Application of the knowledge to mathematical problems.
3	Social competencies	Inquisitiveness and perseverance.
Assumptions and objectives of the course: Giving of mathematical knowledge in the range of Course description, teaching of applications and preparing to further studies.		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. Student has knowledge in the range of Course description. - [K_W01] 2. He knows rules of drawing in space. - [K_W02] 3. He knows calculate mechanical quantities in space. - [K_W04]		
Skills:		
1. Student can define complex mathematical models in technical sciences. - [K_U03] 2. He can calculate static moments and moments of inertia of sets in space. - [K_U04] 3. He uses Internet to seek needed informations. - [K_U17]		
Social competencies:		
1. Student is able to work independently and in a team. - [K_K01] 2. He takes responsibility for his results. - [K_K02] 3. He can supplement his mathematical knowledge. - [K_K03]		
Assessment methods of study outcomes		

1. Systematically, marks in solution of mathematical problems. 2. In the semester, two written tests on the basis of Classes. 3. After finishing the semester: - building project using mathematical contents, - written exam on the basis of Lectures.		
Course description		
Actualization 2017/2018 1. Plane in space. Quadrics. 2. Differential calculus of functions of many variables. 3. Double and line integrals. 4. Number and power series. 5. Ordinary differential equations of the first and second order. 6. Calculus of probability. 7. Elements of mathematical statistics. The applied methods of education: - lecture led in interactive way implemented by examples on board, - theory presented in close connection with practical tasks, - in track of lecture formulating questions to students and initiating the discussion, - recommendation materials for self-completion of the message, - during classes solving on board example tasks, - discussions on various methods of solution, - the students activity is taken into account during the final evaluation.		
Basic bibliography: 1. M. Mączyński, J. Muszyński, T. Traczyk, W. Żakowski, Matematyka - podręcznik podstawowy dla WST, PWN, t.I - Warszawa 1979, t.II - Warszawa 1981. 2. J. Mikołajski, Z. Sołtysiak, Zbiór zadań z matematyki dla studentów wyższych szkół technicznych, Wydawnictwo PWSZ w Kaliszu, cz. I - Kalisz 2009, cz. II - Kalisz 2010, cz.III - Kalisz 2008, cz.IV - Kalisz 2014.		
Additional bibliography: 1. C. L. Mett, J. C. Smith, Calculus with applications, McGraw-Hill Book Company, New York ... 1985. 2. W. Żakowski, Ćwiczenia problemowe dla politechnik, Wydawnictwa Naukowo - Techniczne, Warszawa 1991.		
Result of average student's workload		
Activity	Time (working hours)	
1. Active participation in meetings (lectures and classes).	45	
2. Active participation in consultations with posing questions.	10	
3. Solving exercises designed for individual work.	30	
4. Individual studying theoretical questions.	10	
5. Preparing to get credits for the second semester.	30	
Student's workload		
Source of workload	hours	ECTS
Total workload	125	5
Contact hours	55	2
Practical activities	70	3
