STUDY MODULE DESCRIPTION FORM						
Name of the module/subject C				de		
Tech	nology of indus	tral building	10	10101161010113423		
Field of study Civil Engineering First-cycle Studies			Profile of study (general academic, practical) (brak)	Year /Semester		
Elective	path/specialty	•	Subject offered in:	Course (compulsory, elective)		
		-	Polish	elective		
Cycle of	study:		Form of study (full-time,part-time)			
	First-cyc	le studies	full-time			
No. of hours				No. of credits		
Lectur	e: 15 Classes	s: - Laboratory: -	Project/seminars: 15	2		
Status o	f the course in the study	program (Basic, major, other) (brak)	(university-wide, from another field) (brak)			
Educatio	on areas and fields of sci	ence and art		ECTS distribution (number and %)		
techn	ical sciences			2 100%		
	Technical scie	ences		2 100%		
Responsible for subject / lecturer: Responsible for subject				lecturer:		
Józe	ef Jasiczak		Marlena KUCZ			
ema	ill: jozef.jasiczak@put.	.poznan.pl	email: marlena.kucz@put.poznanpl			
tei. t	on 6652494 ownictwa i Inżvnierii Ś	irodowiska	tel. 616652464 Budownictwa i Inżynierii Środowiska			
Piot	rowo5, Poznań		Piotrowo5, Poznań			
Prere	quisites in term	s of knowledge, skills an	d social competencies:			
1	Knowledge	The student has a basic knowled	dge of technology and building materials			
2	Skills	Able to obtain information from t obtained.	information from the literature and other sources. It can combine the information			
3	Social competencies	The student should be aware of for learning throughout their wor teamwork.	are of the consequences of their decisions. Understands the need eir working lives. He understands the need for cooperation and			
Assu	mptions and obj	ectives of the course:				
-The aim of the course is to acquaint students with the technology implementation of housing facilities, utilities and industrial construction site. The building, technology implementation, method of construction objects, technological systems.						
	Study outco	mes and reference to the	educational results for a	field of study		
Know	/ledge:			-		
1. Knov develoj	ws the principles of de	sign and analysis of selected obje ind demolition of buildings - [K_W	ects of general construction and ha	is expertise in the		
2. Knov compo	wledge of technology nents - [K_W12, T1P	works and prefabrication, Knows to W02_T1P_W04_]	the rules of the industrial productio	n of building materials and		
3. Knows the most commonly used building materials and basic elements of manufacturing them - [K_W14 T1P_W02 T1P_W05 T1P_W10]						
Skills	:					
1. Student uses information technology, Internet resources and other sources to search for information, communication and acquisition software to support the work of the designer and organizer of the construction works. Student is able to integrate the information obtained, to make their interpretation, as well as to draw conclusions and formulate and justify opinion - [K_U16 T1P_U01 T1P_U03 T1P_U04 T1P_U05]						
2. Student Knows the rules of production and use, and can make the selection of building materials to the end to design technological solutions - [K_U19 T1P_U01 T1P_U13]						
Social competencies:						
1. Stud 2 Stu	ent understands the n dents can see the nee	eed of team effort in solving theo ed for continuing to increase the d	retical and practical problems - lepth and breadth of their knowlede	K_K01 T1P_K03 T1P_K04] ge - [K_K03 T1P_K01]		

Assessment methods of study outcomes					
-Final test. scale of marks [%]					
91-100, very good (A)					
81-90, good+ (B)					
71-80, good (C)					
61-70, satisfactory+ (D)					
51-60, satisfactory (E)					
less than 50, fail (F)					
Continuous assessment of progress made by students, their activity in gaining knowledge/skills					
Course description					
-Evolution of construction technologies in the years 1945 - 2014					
Overview and characteristics of the forming equipment for concrete construction technology monolithic					
Climatic conditions of the execution of works of concrete at a construction site					
Support of construction projects					
Prefabrication. Prefabrication plants.					
Prefabrication systems: Szczecin, Rataje, Winogrady.					
Technological defects prefabricated buildings and repair methods.					
Modernization of prefabricated buildings.					
steel and wooden structures.					
Building insulation systems.					
Basic bibliography:					
Additional bibliography:					
Result of average student's workload					
Activity		Time (working hours)			
1. lecture	30				
2. studying the source materials (literature, internet etc.)	20				
Student's workload					
Source of workload	hours	ECTS			
Total workload	50	2			
Contact hours	30	1			
Practical activities	0	0
