

STUDY MODULE DESCRIPTION FORM		
Name of the module/subject Underground Structures		Code 1010101161010120210
Field of study Civil Engineering First-cycle Studies	Profile of study (general academic, practical) (brak)	Year /Semester 3 / 6
Elective path/specialty -	Subject offered in: Polish	Course (compulsory, elective) elective
Cycle of study: First-cycle studies	Form of study (full-time, part-time) full-time	
No. of hours Lecture: 15 Classes: - Laboratory: - Project/seminars: 15		No. of credits 2
Status of the course in the study program (Basic, major, other) (brak)		(university-wide, from another field) (brak)
Education areas and fields of science and art technical sciences		ECTS distribution (number and %) 2 100%
Responsible for subject / lecturer: dr inż. Iwona Jankowiak email: iwona.jankowiak@put.poznan.pl tel. 61 6475828 Budownictwa i Inżynierii Środowiska ul. Piotrowo 5, 61-138 Poznań		
Prerequisites in terms of knowledge, skills and social competencies:		
1	Knowledge	Knowledge of the strength of materials, structural mechanics, soil mechanics, concrete structures, steel structures, foundation design and fundamentals
2	Skills	Skills related to the static calculations and design of concrete and steel structures, self-learning skills
3	Social competencies	Ability to adapt of the type of any civil engineering structure to the communication requirements and social expectations, respect for the Polish language, understand the need for lifelong learning and group collaboration
Assumptions and objectives of the course: The aim of the subject is presentation of basic problems of design, construction and building of underground structures.		
Study outcomes and reference to the educational results for a field of study		
Knowledge:		
1. Student knows the specifics of the work and design of different types of underground structures - [K_W08, K_W09] 2. Student knows the basis form of underground structures - [K_W09] 3. Student knows the main loads acting on the underground structures - [K_W10]		
Skills:		
1. Student can name create the form of underground structures - [K_U02, K_U03] 2. Student can perform the basic static-strength calculations of main structural components of any underground structure - [K_U02, K_U04] 3. Student can conduct calculations in accordance with the principles with the principles set out in the new system of European standards PN-EN - [K_U08]		
Social competencies:		
1. Student can adapt the type of structure to the communication requirements and social expectations - [K_K08] 2. Student can collaborate and work together in a group, is aware of the need for self-education - [K_K07] 3. Student complies with the principles of the Polish language and the rules of preparation of technical documentation - [K_K01, K_K03]		
Assessment methods of study outcomes		

Written test of the student's knowledge in the field of material presented during the lectures Preparation of some static-strength calculation of simple underground structure (project)		
Course description		
Lectures: Definitions. Classification of underground structures. Initial design of tunnels. Cross-section design factors. Shallow founded tunnels structural elements and construction. Loads and static computations of shallow founded tunnels. Tunnel fittings. Shallow founded tunnels building methods.		
Basic bibliography: 1. Furtak K., Kędracki M.: Podstawy budowy tuneli, Wydawnictwo PK, Kraków 2005 2. Świst E.: Hydrotechniczne i komunikacyjne budowle podziemne, Wydawnictwo STO, Katowice 2006 3. Stamatello H.: Tunele i mkiejskie budowle podziemne, Arkady, Warszawa 1970 4. Józef Bartoszewski, Stanisław Lessaer: Tunele i przejścia podziemne w miastach, WKiŁ Warszawa 1971		
Additional bibliography: 1. Arkadiusz Madaj, Witold Wołowicki: Podstawy projektowania budowli mostowych, WKiŁ Warszawa 2003/2007 2. Arkadiusz Madaj, Witold Wołowicki: Projektowanie mostów betonowych, WKiŁ Warszawa 2010 3. Henryk Czudek, Wojciech Radomski: Podstawy mostownictwa, PWN Warszawa 1983		
Result of average student's workload		
Activity	Time (working hours)	
1. Participation in lectures	30	
2. Studying	20	
Student's workload		
Source of workload	hours	ECTS
Total workload	50	2
Contact hours	30	1
Practical activities	20	1
