

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS) pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

COURSE DESCRIPTION CARD - SYLLABUS

Course name			
Plastic processing			
Course			
Field of study		Year/Semester	
Education in Technology and Informatics		3/5	
Area of study (specialization)		Profile of study	
		general academic	
Level of study		Course offered in	
First-cycle studies		polish	
Form of study		Requirements	
full-time		compulsory	
Number of hours			
Lecture	Laboratory classes	Other (e.g. online)	
15	15		
Tutorials	Projects/seminars		
Number of credit points 2			
Lecturers			
Responsible for the course/lectu	ırer: Respon	Responsible for the course/lecturer:	
dr inż. Kinga Mencel			
e-mail: kinga.mencel@put.pozn	an.pl		
tel. 61 665-2787			
Faculty of Mechanical Engineeri	ng		
Piotrowo street 3, 60-965 Pozna	ń		

Prerequisites

Basic knowledge of physics, chemistry, materials science. The ability to think logically, to use information obtained from the library and the Internet. Understanding the need to learn and acquire new knowledge.

Course objective

Understanding the methods of testing polymer materials, determining the influence of the structure on the properties of the material

Course-related learning outcomes

Knowledge

1 The student should characterize the basic properties of theorem. pcs. K1_W03, K1_W02, K1_W10

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS) pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

2 The student should characterize the basic techniques of producing theorem. pcs, K1_W03, K1_W12, K1_W04

3 The student should receive products obtained with the given technology K1_W04, K1_W11

Skills

1 The student is able to choose the appropriate technology K1_U01, K1_U03, K1_U05, K1_U10

2 The student is able to propose a replacement technique for producing K1_U10, K1_U01, K1_U05

3 The student is able to carry out the basic processing of K1_U05, K1_U04, K1_U09

Social competences

1 The student is able to work in a group, K1_K03

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Lecture: Pass on the basis of a test consisting of 5 general questions (pass if the correct answer is given to at least 3 questions: <3 - ndst, 3 - dst, 3.5 - dst +, 4 - db, 4.5 - db +, 5 - very good) carried out at the end of the semester.

Laboratory: Assessment based on an oral or written answer concerning the content of each performed laboratory exercise, a report on each laboratory exercise according to the instructions of the laboratory teacher. In order to pass the laboratories, all exercises must be passed (positive grade from the answers and the report).

Programme content

Lecture:

1. Technological processes used in the processing of plastics / injection,

embossing, pressing, laminating, vacuum forming, rotational molding,

production of polymer composites, joining plastics,

applying coatings /.

2. Phenomena occurring during the implementation of various plastics processing processes

3. The influence of technological parameters of processing processes on the properties of the products produced

plastic products.

4. Typical defects of plastic products made with different technologies and methods

their prevention

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS) pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

5. Discussion of the specifics of individual processes and their possible applications in practice

industrial.

Lab:

- 1.Injection technology.
- 2. Extrusion technology.
- 3. Laminating technology.
- 4. Thermoforming technology.
- 5. Joining products from polymer materials.
- 6. Applying polymer coatings to metal products

Teaching methods

- 1. Lecture: presentation illustrated with animations and examples, solving of simple problems
- 2. Laboratory: realization of experiments, evaluation of results, discussion

Bibliography

Basic

- 1. Bociąga E: Specjalne metody wtryskiwania tworzyw polimerowych, WNT, Warszawa 2010
- 2. Praca zbiorowa. Poradnik "Tworzywa sztuczne", WNT, Warszawa 2006
- 3. Haponiuk J.T.; Tworzywa sztuczne w praktyce; Wyd. VerlagDashofer, Warszawa 2008
- 4. Frącz W., Krywult B.- Projektowanie i wytwarzanie elementów z tworzyw sztucznych, Oficyna wydawnicza Politechniki Rzeszowskiej, 2005

Additional

- 1. Czasopisma: Plastics Review, RubberReview, Plast News, Tworzywa Sztuczne.
- 2. Charrier J-M.: Polymer Materials and Processing, Hanser Publishers, New York, 1990

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS) pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

Breakdown of average student's workload

	Hours	ECTS
Total workload	60	2,0
Classes requiring direct contact with the teacher	35	1,0
Student's own work (literature studies, preparation for	30	1,0
laboratory classes/tutorials, preparation for tests/exam, project		
preparation) ¹		

¹ delete or add other activities as appropriate
