part-time

Year/Semester

1/2

Profile of study

general academic

Course offered in

Polish

Requirements

compulsory

Number of hours

Lecture

14

Tutorials

12

Laboratory classes

Projects/seminars

Other (e.g. online)

Number of credit points

3

Lecturers

Responsible for the course/lecturer:

dr hab. Marek Szczepański, prof. PP

email: marek.szczepanski@put.poznan.pl

tel. 616653393

Wydział Inżynierii Zarządzania

ul. J.Rychlewskiego 2, 60-965 Poznań

Responsible for the course/lecturer:

Prerequisites

The student has a basic knowledge of logistics. Is able to obtain and interpret basic legal acts and other

regulations (e.g. General Terms and Conditions of Insurance) regarding business insurance. Has the ability to teamwork and apply knowledge of the economy and knowledge of the law to solve problems related to the risk management of a logistics company.

Course objective

The aim of the course is to familiarize students with the basic knowledge in the field of business insurance (especially transport insurance). To develop practical skills related to making decisions on the selection of insurance for specific types of risk in a logistics company. To develop the ability to assess the types of risk and properly apply the methods of its reduction (insurance method and non-insurance methods).

Course-related learning outcomes

Knowledge

1. knows the ruling dependencies in insurance and their connections with logistics [P7S_WG_01]
2. knows the detailed methods, tools and techniques characteristic of business insurance [P7S_WK_01]
3. knows the phenomena and contemporary trends characteristic of insurance used in logistics [P7S_WK_03]

Skills

1. is able to communicate using appropriately selected means in organizing insurance coverage [P7S_UW_02]
2. is able to make a critical analysis of technical solutions used in the analyzed logistics system requiring insurance protection [P7S_UW_04]
3. is able to identify changes in requirements, standards and regulations within the insurance market intended for logistics [P7S_UU_01]

Social competences

1. correctly identifies and resolves dilemmas related to compliance with professional ethics and respect for the diversity of views and cultures in relation to the risk and need for business insurance [P7S_KK_02]
2. is aware of the responsibility for own work and readiness to comply with the rules of teamwork and taking responsibility for jointly implemented tasks [P7S_KR_01]

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Exercise grade:

Formative assessment (partial):

1. One colloquium to check the state of knowledge during exercises (test with open and closed questions, tasks) in the last quarter of the class.

2. Project prepared in groups? insurance program for a selected logistics company.

Lecture grade:

Summative rating:

1. The final test checking knowledge of the entire program of the subject (closed and open questions, tasks, e.g. calculation of the amount of compensation in various insurer liability systems).
