

## COURSE DESCRIPTION CARD - SYLLABUS

Course name

Seminarium dyplomowe (Diploma seminar)

|   |  | Course            |
|---|--|-------------------|
| Field of study                              |  | Year/Semester     |
| Technologia chemiczna (Chemical Technology) |  | IV/7              |
| Area of study (specialization)              |  | Profile of study  |
| -   |  | general academic  |
| Level of study                              |  | Course offered in |
| First-cycle studies                         |  | Polish            |
| Form of study                               |  | Requirements      |
| full-time                                   |  | compulsory        |

|                                |                    | Number of hours     |
|--------------------------------|--------------------|---------------------|
| Lecture                        | Laboratory classes | Other (e.g. online) |
| 0                              | 0                  | 0                   |
| Tutorials                      | Projects/seminars  |                     |
| 0                              | 15                 |                     |
| <b>Number of credit points</b> |                    |                     |
| 2                              |                    |                     |

|  |  | Lecturers                            |
|--|--|--------------------------------------|
| Responsible for the course/lecturer:             |  | Responsible for the course/lecturer: |
| Professor Teofil Jesionowski                     |  |                                      |
| e-mail: Teofil.Jesionowski@put.poznan.pl         |  |                                      |
| telephone 61 665-37-20                           |  |                                      |
| Faculty of Chemical Technology                   |  |                                      |
| Institute of Chemical Technology and Engineering |  |                                      |
| Berdychowo 4, PL-60965 Poznan                    |  |                                      |

**Prerequisites**

Structured knowledge covering the curriculum of the first degree studies in the field of Chemical Technology. The ability to solve elementary problems based on knowledge and the ability to obtain information from specified sources in Polish and a foreign language. Understanding the need for further education, understanding the need to expand their competences, readiness to cooperate within a team.

### Course objective

The aim is to familiarize students with the requirements and standards of preparing an engineering diploma thesis. Monitoring progress in the implementation of the diploma thesis. Discussing problems

arising during the implementation of this task. The ability to present the results and confront them with the current state of knowledge.

### Course-related learning outcomes

#### Knowledge

K\_W03 - has the necessary knowledge in chemistry and chemical technology in the field enabling understanding of chemical phenomena and processes

K\_W08 - has a systematically and theoretically founded general knowledge in the field of general and inorganic chemistry, organic, physical and analytical chemistry, chemical technology and engineering

K\_W09 - has the necessary knowledge about both natural and synthetic raw materials, products and processes used in chemical technology, as well as about the directions of development of the chemical industry in the country and in the world

K\_W11 - has the necessary knowledge in the field of techniques and methods for characterizing and identifying chemical substances

K\_W13 - has knowledge in the field of technology and chemical engineering, machine science and apparatus of the chemical industry

#### Skills

K\_U01 - can obtain the necessary information from literature, databases and other sources related to chemical sciences, correctly interprets them, draws conclusions, formulates and justifies opinions

K\_U02 - can work both individually and as a team in a professional and other environment

K\_U04 - can prepare and present in Polish an oral presentation concerning chemical technology

K\_U05 - has the ability to self-study

K\_U14 - is able to assess the usefulness of routine methods and techniques appropriate to solve practical engineering tasks in chemical technology, can also choose and apply the appropriate method and technique

K\_U16 - based on general knowledge, explains the basic phenomena associated with significant processes in chemical technology

K\_U17 - uses correct chemical terminology and nomenclature of chemical compounds, also in English

K\_U18 - distinguishes between types of chemical reactions and has the ability to select them for chemical processes

K\_U22 - determines the physical and chemical, mechanical and thermal properties of chemical compounds and materials

K\_U25 - assesses the risks associated with the use of chemical products and processes

K\_U33 - solves simple engineering tasks related to the implementation of unit processes and operations in chemical technology

Social competences

K\_K01 - understands the need for further training and raising their professional, personal and social competences

K\_K02 - is aware of the importance and understanding of non-technical aspects and effects of engineering activities, including their impact on the environment and the associated responsibility for decisions made

K\_K03 - is able to cooperate and work in a group, inspire and integrate engineering environments

### Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Presentations (two) regarding the basics of the thesis being carried out and the results obtained during its realization. Criteria: form of presentation, self-presentation skills, active participation in discussions and answers to asked questions.

### Programme content

1. Introduction - thesis layout - the most common formal and substantive errors.
2. Anti-plagiarism - an overview of the system's functioning and related guidelines.
3. Possibilities of searching for information in the scope of the diploma thesis, the method of using the source materials and their presentation in the thesis.
4. Assessment of the method of transferring acquired knowledge, preparing presentation of results.

### Teaching methods

Seminar - multimedia presentations or e-learning, group discussion

### Bibliography

Basic

Indicated by the engineering thesis supervisor.

Additional

Indicated by the engineering thesis supervisor.

### Breakdown of average student's workload

|   | Hours | ECTS |
|---|-------|------|
| Total workload  | 45    | 2,0  |
| Classes requiring direct contact with the teacher   | 25    | 1,1  |
| Student's own work (literature studies, preparation for laboratory classes/tutorials, preparation for tests/exam, project preparation) <sup>1</sup> | 20    | 0,9  |

<sup>1</sup> delete or add other activities as appropriate
