Prerequisites

The already acquired language competence compatible with level B2 (CEFR). The ability to use general and field specific vocabulary, and grammatical structures required on the first level of studies. The ability to work individually and in a group; the ability to use various sources of information and reference works.

Course objective

1. Advancing students' language competence towards the level at least B2+ (CEFR).
2. Development of the ability to use field specific language effectively in both receptive and productive language skills.

3. Improving the ability to understand field specific texts.
4. Improving the ability to function effectively on an international market.

Course-related learning outcomes

Knowledge

As a result of the course, the student ought to acquire field specific vocabulary related to the following issues:

1. Advantages and disadvantages of BIM
2. Sustainable Buildings
3. Intelligent Houses
4. Presentations – MSc paper
5. Writing emails and summaries

and to be able to define and explain associated terms, phenomena and processes.

Skills

As a result of the course, the student is able to:

1. give a talk on field specific topic (in English), and discuss field specific issues using an appropriate linguistic and grammatical repertoire
2. understand and analyze international, field specific literature.

Social competences

As a result of the course, the student is able to communicate effectively in a field specific/professional area, and to give a successful presentation in English. The student is able to recognize and understand cultural differences in a professional and private conversation, and in a different cultural environment.

Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

Formative assessment: tests during academic year (written and oral), presentations.

Summative assessment: credit and oral exam. To obtain a positive assessment the student is obliged to pass the material covered by the program with at least 50%.

Programme content

Expanding general and technical vocabulary based on specialized texts; developing skills in understanding professional literature and expressing on topics including issues related to general language and civil engineering: public and state building - stadiums, underground/railway, Burj al Arab, skyscrapers - Empire State Building, presentations – MSc paper, writing emails and summaries.

Teaching methods

auditorium classes, guided text method; The teaching methods are based on the improvement of four basic language competences (listening, speaking, reading, writing) being the medium to expand the substantive knowledge in the field of technical topics.
