3

Lecturers

Responsible for the course/lecturer:

Justyna Czekajewska PhD

Responsible for the course/lecturer:

Justyna Czekajewska PhD

Prerequisites

High school humanistic knowledge

Course objective

The lectures on philosophy with bioethics will present the views of supporters of various philosophical directions on the limits of human cognition and human nature. The subject matter of the classes will include issues from the history of philosophy with the distinction of axiology (ethics) and anthropology. Moreover, medical considerations will be included in the content of the lecture, with particular

emphasis on the contemporary context. The choice of issues will result from the importance of the discussed issues due to current social and medical problems. The aim of the lectures is:

- to equip students with knowledge and argumentation skills
- to develop cognitive curiosity and intellectual activity
- to foster the development of independent and critical thinking
- sensitivity development

Course-related learning outcomes

Knowledge

He has an extended knowledge of ethical theories and current philosophical issues (K_W01). He has an extended knowledge of ethical theories and current philosophical issues (K_W01).

It has competences based on, among others on philosophical, ethical and philosophical anthropological knowledge, necessary to respect patient's rights (K_W01)
