# POZNAN UNIVERSITY OF TECHNOLOGY

### EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

# **COURSE DESCRIPTION CARD - SYLLABUS**

Course name

Human Performance and Limitations 3

**Course** 

Field of study Year/Semester

Aerospace Engineering 2/3-4; 3/5

Area of study (specialization) Profile of study

general academic

Level of study Course offered in

First-cycle studies polish

Form of study Requirements full-time compulsory

**Number of hours** 

Lecture Laboratory classes Other (e.g. online)

45

Tutorials Projects/seminars

**Number of credit points** 

3

**Lecturers** 

Responsible for the course/lecturer: Responsible for the course/lecturer:

dr n. med. Karol Szymański dr hab. inż. Agnieszka Wróblewska, prof.PP

Wydział Inżynierii Środowiska i Energetyki Wydział Inżynierii Środowiska i Energetyki

email: rofe@tlen.pl email: agnieszka.wroblewska@put.poznan.pl

+48 602 631 428 tel. 61 665 2201

#### **Prerequisites**

A student starting this subject should have a basic knowledge of general and aviation psychology, the nature and functioning of human cognitive, emotional and motivational processes. He should also have the ability to apply the scientific method in solving problems and be ready to cooperate within a team.

# **Course objective**

To acquaint the student with the emotional and motivational processes of man functioning in normal, difficult and extreme situations. Basic human cognitive processes - perception and attention and their importance in the process of information management in the human - technical object system. The dynamics of small social groups and its application in the process of constructing effective task teams in aviation. Crew / team resource management (CRM).

# POZNAN UNIVERSITY OF TECHNOLOGY

### EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

# **Course-related learning outcomes**

# Knowledge

- 1. has detailed knowledge related to selected issues in the field of human capabilities and limitations when operating an aircraft in flight, its impact on health and the ability to perform air operations, as well as opportunities to improve physical condition.
- 2. has basic knowledge of technical vocabulary, in particular specialized terminology used in the fields of science and technology related to aviation engineering.
- 3. has basic knowledge necessary to understand profile subjects and knowledge in the field of society and the environment in the field of aviation engineering for selected specialties:
- 1. Piloting of aircraft
- 2. Aero engines and airframes.

#### Skills

- 1. knows how to use a language to a degree enabling understanding of technical texts in the field of aviation (knowledge of technical terminology).
- 2. is able to communicate using various techniques in a professional environment and other environments using the formal record of construction, technical drawing, concepts and definitions of the scope of the studied field of study.
- 3. can obtain information from literature, the Internet, databases and other sources. Is able to integrate obtained information, interpret and draw conclusions from them.

# Social competences

- 1. is aware of the importance of maintaining the principles of professional ethics.
- 2. is aware of the importance and understands the non-technical aspects and effects of engineering activities, including its impact on the environment, and the associated responsibility for the decisions taken.
- 3. Understands the need for critical assessment of knowledge and continuous learning.

# Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

#### Lecture:

- assessment of knowledge and skills demonstrated on the written test - 1.5 hour

# **Programme content**

Lecture:

semester 3:

# POZNAN UNIVERSITY OF TECHNOLOGY

### EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

Human factors in aviation. Flight safety concepts. Threat and error management (TEM) model and SHELL model. Safety culture and safety management. Fatigue and stress management.

#### semester 4:

Basic aviation psychology. Human information processing. Attention and vigilance. Perception. Memory. Integration of sensory inputs. Body rhythm and sleep. Response selection. Motivation. Individual differences in personality and motivation. Human overload and underload. Arousal.

#### semester 5:

Human error and reliability. Reliability of human behaviour. Theory and model of human error. Error generation. Decision-making concepts. Avoiding and managing errors: cockpit management. Safety awareness. Coordination (multi-crew concepts). Human behaviour. Advanced cockpit automation.

### **Teaching methods**

1. Lecture: multimedia presentation, illustrated with examples given on the board.

# **Bibliography**

#### Basic

- 1. Szajnar S.: "Czynnik ludzki w obsłudze urządzeń technicznych", Skrypt WAT, Warszawa 2010.
- 2. Janowska Z.: "Zarządzanie zasobami ludzkimi", Polskie Wydawnictwo Ekonomiczne, 2010
- 3. Scott W. E., Cummings L. L.: "Zachowanie człowieka w organizacji", Państwowe Wydawnictwo Naukowe, 1983
- 4. www.faa.gov
- 5. www.easa.europa.eu

Additional

# Breakdown of average student's workload

	Hours	ECTS
Total workload	76	3,0
Classes requiring direct contact with the teacher	56	2,2
Student's own work (literature studies, preparation for written tests ) <sup>1</sup>	20	0,8

<sup>&</sup>lt;sup>1</sup> delete or add other activities as appropriate
