## POZNAN UNIVERSITY OF TECHNOLOGY

#### EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

# **COURSE DESCRIPTION CARD - SYLLABUS**

Course name

Advanced data compression

Course

Field of study Year/Semester

Electronics and Telecommunciations II/IV

Area of study (specialization) Profile of study

Level of study general academic
Course offered in

Second-cycle studies English

Form of study Requirements

full-time elective

Number of hours

Lecture Laboratory classes Other (e.g. online)

30 0

Tutorials Projects/seminars

0 15

**Number of credit points** 

4

#### **Lecturers**

Responsible for the course/lecturer:

Responsible for the course/lecturer:

prof. dr hab. inż. Marek Domański

marek.domanski@put.poznan.pl

tel. 616653901

#### **Prerequisites**

- 1. Student has a systematic knowledge of mathematical analysis, algebra and theory of probability.
- 2. Has a systematic knowledge, together with necessary mathematical background, of digital signal processing, introduction to multimedia, multimedia systems.

#### POZNAN UNIVERSITY OF TECHNOLOGY

#### EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

- 3. Demonstrates the ability to solve problems related to signal analysis in time domain and in frequency.
- 4. Basic programming skills.

# **Course objective**

The student will gain the general detailed knowledge on digital television with the emphasis on IP television, video over-the-top and IP multimedia.

### **Course-related learning outcomes**

## Knowledge

A student has knowledge on modern television systems mostly based on IP networks, including IP television, video over-the-top and IP multimedia.

#### Skills

Design skills in television and multimedia systems, in particular related to those based on IP networks.

#### Social competences

A student recognises the social and economical background of development of modern broadcasting and multicasting systems on consumer market.

# Methods for verifying learning outcomes and assessment criteria

Learning outcomes presented above are verified as follows:

### 1. Lecture

Written and / or oral exam. The exam consists of a few to over a dozen questions (depending on the assumed nature of the questions) and concerns the content presented during the lectures. The exact nature of the exam questions will be presented to students during one of the last lectures. Pass threshold: 50% of points.

## 2. Projects

Presentation of the results of projects made by students. Assessment of the results obtained, the complexity of the project and the presentation of the project itself.

#### **Programme content**

#### 1. Lecture

Introduction and repetition: Basic television systems worldwide. SDTV/HDTV/UHDTV. 4k and 8k and the fortcoming AV systems.

3D video and audio. Spatial audio. Ambisonics and audio objects.

IP television: interactive services. Video over-the-top: IP multimedia, today and tomorrow, Virtual reality and augmented reality. Virtual navigation. Interactive audiovisual systems of the future. Ultrarealistic IP multimedia systems. Immersive video and audio. OMAF.

## POZNAN UNIVERSITY OF TECHNOLOGY

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

pl. M. Skłodowskiej-Curie 5, 60-965 Poznań

Mobile television. DVB-DASH.

New platform: MPEG Media Traport MMT,

## 2. Projects

Projects are strictly related to the topics of IP multimedia and digital television.

## **Teaching methods**

#### 1. Lecture

Classes with clear elements of traditional lecture and problem lecture (discussion with students of a specific problem), depending on the content of the presented material. Presentation of the theory and methods with examples of their use. Selected contents of the lecture are presented on a multimedia projector or board. The discussion of the issues is accompanied by information on their practical application.

#### 2. Projects

Solving problems given by the teacher. Interpretation of the received solutions and formulation of conclusions. Discussion of the practical application of the methods/algorithms being the subject of projects. Practice in presenting the project results.

#### **Bibliography**

**Basic** 

ETSI Standards, available on etsi.org.

U. Reimers, DVB, Springer, 2008 (i inne wydania).
